

## Disclaimer

The following report(s) provides findings from an FDA-initiated query using its Mini-Sentinel pilot. While Mini-Sentinel queries may be undertaken to assess potential medical product safety risks, they may also be initiated for various other reasons. Some examples include determining a rate or count of an identified health outcome of interest, examining medical product use, exploring the feasibility of future, more detailed analyses within Mini-Sentinel, and seeking to better understand the capabilities of the Mini-Sentinel pilot.

Data obtained through Mini-Sentinel are intended to complement other types of evidence such as preclinical studies, clinical trials, postmarket studies, and adverse event reports, all of which are used by FDA to inform regulatory decisions regarding medical product safety. The information contained in this report is provided as part of FDA's commitment to place knowledge acquired from the Mini-Sentinel pilot in the public domain as soon as possible. Any public health actions taken by FDA regarding products involved in Mini-Sentinel queries will continue to be communicated through existing channels.

FDA wants to emphasize that the fact that FDA has initiated a query involving a medical product and is reporting findings related to that query does not mean that FDA is suggesting health care practitioners should change their prescribing practices for the medical product or that patients taking the medical product should stop using it. Patients who have questions about the use of an identified medical product should contact their health care practitioners.

The following report contains a description of the request, request specifications, and results from the modular program run(s).

If you are using a web page screen reader and are unable to access this document, please contact the Mini-Sentinel Operations Center for assistance at [info@mini-sentinel.org](mailto:info@mini-sentinel.org).

**Overview**

**Request Description** FDA requested use of Modular Program #3 to investigate hemolysis events (see Appendix B) following new use of several Ig products (see Appendix A) with varying follow-up periods based on last date of exposure for each episode (exposure extension period). Users were excluded if evidence of use of another product listed in Appendix A was found in the 28 days before, the day of, or the 28 days after index use of the exposure of interest. In addition, the Charlson Comorbidity Index module was used. Two runs were executed to analyze two different age cohorts: one with all age groups, and a second with the 0-17 age group excluded. In total, 80 different scenarios (see Specifications - the 40 scenarios run twice with the different age groupings) were examined in this request with differing exposures and exposure extension periods. The time window for the request was January 1, 2006 to December 31, 2012. The package was distributed to 18 Data Partners on January 28, 2014. Please see the Specifications tab for more details on each scenario. This report provides results for the first run of the program, where the age groupings include 0-17, 18-44, 45-64, 65+ years.

**Table 1** Table displaying the Number of New Users, New Episodes, Dispensings, Total Days Supplied, New Episodes with Events, Number of Events, Years at Risk, Eligible Members, Member-Years, New Users per 100,000 Eligible Members, Dispensings per User, New Episodes with Events per 1,000 Years at Risk, and Number of Events per 1,000 Years at Risk by Drug Product and Episode Extension Period\*

**Table 2** Table displaying the Number of New Users, New Episodes, Dispensings, Total Days Supplied, New Episodes with Events, Number of Events, Years at Risk, Eligible Members, Member-Years, New Users per 100,000 Eligible Members, Dispensings per User, New Episodes with Events per 1,000 Years at Risk, and Number of Events per 1,000 Years at Risk by Drug Product, Episode Extension Period and Age Group\*

**Table 3** Table displaying the Number of New Users, New Episodes, Dispensings, Total Days Supplied, New Episodes with Events, Number of Events, Years at Risk, Eligible Members, Member-Years, New Users per 100,000 Eligible Members, Dispensings per User, New Episodes with Events per 1,000 Years at Risk, and Number of Events per 1,000 Years at Risk by Drug Product, Episode Extension Period and Sex\*

**Table 4** Table displaying the Number of New Users, New Episodes, Dispensings, Total Days Supplied, New Episodes with Events, Number of Events, Years at Risk, Eligible Members, Member-Years, New Users per 100,000 Eligible Members, Dispensings per User, New Episodes with Events per 1,000 Years at Risk, and Number of Events per 1,000 Years at Risk by Drug Product, Episode Extension Period and Year\*

**Table 5** Table displaying the Number of New Users, New Episodes, Dispensings, Total Days Supplied, New Episodes with Events, Number of Events, Years at Risk, Eligible Members, Member-Years, New Users per 100,000 Eligible Members, Dispensings per User, New Episodes with Events per 1,000 Years at Risk, and Number of Events per 1,000 Years at Risk by Drug Product, Episode Extension Period and Pre-Index Charlson Comorbidity Index (CCI) Score\*

**Appendix A** List of exposure drug codes

**Appendix B** List of event diagnosis codes

**Notes:** \* Dispensings = Days Supplied = Amount Supplied since the exposures are procedure codes. Therefore, Days Supplied, Amount Supplied, and associated rates are omitted from the tables.

Please contact the Mini-Sentinel Operations Center (MSOC\_Requests@harvardpilgrim.org) for questions and to provide comments/suggestions for future enhancements to this document.

**to09y05\_mpr\_wp14\_v03 Specifications**

Modular Program #3 was used to investigate hemolysis events (see Appendix B) following new use of several Ig products (see Appendix A) with varying follow-up periods based on last date of exposure for each episode (exposure extension period). Users were excluded if evidence of use of another product listed in Appendix A was found in the 28 days before, the day of, or the 28 days after index use of the exposure of interest. In addition, the Charlson Comorbidity Index module was used. Two runs were executed to analyze two different age cohorts: one with all age groups and the second excluding the 0-17 age group. In total, 80 different scenarios (the 40 below run twice with the different age groupings) were examined in this report with differing exposures and exposure extension periods. See below for a description of each of these scenarios.

**Coverage Requirement** Drug and Medical Coverage  
**Query Period** January 1, 2006 to December 31, 2012  
**Enrollment Gap** 45 Days  
**Enrollment Days** 183  
**Age Stratifications** Run 1: 0-17, 18-44, 45-64, 65+  
 Run 2: 18-44, 45-64, 65+  
**Minimum Days Supplied and** 0 Days

All exposure, event, and pre-existing condition codes provided by FDA requester.

## Glossary of Terms in Modular Program 3\*

- Amount Supplied** - number of units (pills, tablets, vials) dispensed. Net amount per NDC per dispensing. This is equivalent to the "RxAmt"
- Blackout Period** - number of days at the beginning of a treatment episode that events are to be ignored. If an event occurs during the blackout period, the episode is excluded.
- Care Setting** - type of medical encounter or facility where the exposure, event, or condition code was recorded. Possible care settings include: Inpatient Hospital Stay (IP), Non-Acute Institutional Stay (IS), Emergency Department (ED), Ambulatory Visit (AV), and Other
- Cohort Definition (drug/exposure)**- Indicates how the cohort will be defined: (1) 01: Cohort includes only the first valid incident treatment episode during the query period; (2) 02: Cohort includes all valid incident treatment episodes during the query period; (3) 03: Cohort includes all valid incident treatment episodes during the query period until an event occurs
- Days Supplied** - number of days supplied for all dispensings in qualifying treatment episodes.
- Years at Risk** - number of days supplied plus any episode gaps and exposure extension periods all divided by 365.25.
- Eligible Members** - Number of members eligible for an incident treatment episode (defined by the drug/exposure and event washout periods) with drug and medical coverage during the query period.
- Enrollment Gap** - number of days allowed between two consecutive enrollment periods without breaking a "continuously enrolled"
- Episode Gap** - number of days allowed between two (or more) consecutive exposures (dispensings/procedures) to be considered the same
- Event Deduplication** - specifies how events are counted by the MP algorithm: A value of 0 counts all occurrences of an event group code of interest; a value of 1 de-duplicates occurrences of the same event code on the same day (i.e., de-duplicates at the exact match code level); and a value of 2 de-duplicates occurrences of the same event group code on the same day (e.g., de-duplicates at the GROUP level).
- Exposure Extension Period** - number of days post treatment period in which the outcomes/events are counted for a treatment episode.
- Lookback Period (pre-existing condition)** - number of days wherein a member is required to have evidence of pre-existing condition (diagnosis/procedure/drug dispensing).
- Member-Years** - sum of all days of enrollment with medical and drug coverage\*\* in the query period preceded by an exposure washout
- Minimum Days Supplied** - specifies a minimum number of days in length of the days supplied for the episode to be considered
- Minimum Episode Duration** - specifies a minimum number of days in length of the episode for it to be considered
- New Episodes** - new treatment episodes; length of episode is determined by days supplied in one dispensing (or consecutive dispensings
- New Episodes with Events** - number of unique episodes during which at least one incident event occurs. Each episode may only be counted
- New Users** - number of members with incident exposure during the query period. Member must have no evidence of exposure (s) of interest (defined by incidence criteria) in the prior washout period. A user may only be counted once in a query period.
- Number of Events** - total number of incident events. An individual or a treatment episode can have more than one incident event provided that the incident event meets the event incidence criteria.
- Principal Diagnosis (PDX)** - diagnosis or condition established to be chiefly responsible for admission of the patient to the hospital. YES will only consider diagnoses flagged as Principal
- Query Period** - period in which the modular program looks for exposures and outcomes of interest.
- Treatment Episode Truncation Indicator** - indicates whether observation of the incident query code during follow-up requires truncation of valid treatment episodes. A value of Y indicates that the treatment episodes should be truncated at the first occurrence of an incident query code. A value of N indicates that the treatment episodes should not be truncated at the occurrence of the incident query code.
- Washout Period (drug/exposure)\*\*** - number of days a user is required to have no evidence of prior exposure (drug dispensing/procedure) and continuous drug and medical coverage prior to an incident treatment episode.
- Washout Period (event/outcome)\*\*** - number of days a user is required to have no evidence of a prior event (procedure/diagnosis) and continuous drug and medical coverage prior to an incident treatment episode.

\*all terms may not be used in this report

\*\*incident treatment episodes must be incident to both the exposure and the event

**Appendix A. Code List for Ig Products**

<b>IVIg Product</b>	<b>Code</b>	<b>Code Type</b>
Gammaflex	J1557, C9270	HCPCS
Privigen	J1549, Q4097	HCPCS
Gamunex	J1561, Q4092	HCPCS
Octagam	J1568, Q4087	HCPCS
Gammagard Liquid	J1569, Q4088	HCPCS
Flebogamma	J1572, Q4091	HCPCS
Lyophilized product IV	J1566, Q9941, Q9942	HCPCS
Non-lyophilized intramuscular route	90281, J1460, J1470, J1480, J1490, J1500, J1510, J1520, J1530, J1540, J1550, J1560, P9014	CPT and HCPCS
Non-lyophilized unspecified route	90399, 99.14	CPT and ICD-9 Procedure
Other IVIg, brand not specified	J1563, J1564, J1567, J1599, Q9943, Q9944, S9545, 90283	HCPCS

**Appendix B. Hemolysis Events**

<b>Description</b>	<b>Code</b>	<b>Code Type</b>
Acquired hemolytic anemias	283*	ICD-9
ABO incompatibility reaction	999.6	ICD-9
Rh incompatibility reaction	999.7	ICD-9
Hemolytic transfusion reaction, incompatibility unspecified	999.83	ICD-9
Acute hemolytic transfusion reaction, incompatibility unspecified	999.84	ICD-9
Delayed hemolytic transfusion reaction, incompatibility unspecified	999.85	ICD-9
