

## Disclaimer

The following report(s) provides findings from an FDA-initiated query using its Mini-Sentinel pilot. While Mini-Sentinel queries may be undertaken to assess potential medical product safety risks, they may also be initiated for various other reasons. Some examples include determining a rate or count of an identified health outcome of interest, examining medical product use, exploring the feasibility of future, more detailed analyses within Mini-Sentinel, and seeking to better understand the capabilities of the Mini-Sentinel pilot.

Data obtained through Mini-Sentinel are intended to complement other types of evidence such as preclinical studies, clinical trials, postmarket studies, and adverse event reports, all of which are used by FDA to inform regulatory decisions regarding medical product safety. The information contained in this report is provided as part of FDA's commitment to place knowledge acquired from the Mini-Sentinel pilot in the public domain as soon as possible. Any public health actions taken by FDA regarding products involved in Mini-Sentinel queries will continue to be communicated through existing channels.

FDA wants to emphasize that the fact that FDA has initiated a query involving a medical product and is reporting findings related to that query does not mean that FDA is suggesting health care practitioners should change their prescribing practices for the medical product or that patients taking the medical product should stop using it. Patients who have questions about the use of an identified medical product should contact their health care practitioners.

The following report contains a description of the request, request specifications, and results from the modular program run(s).

If you are using a web page screen reader and are unable to access this document, please contact the Mini-Sentinel Operations Center for assistance at [info@mini-sentinel.org](mailto:info@mini-sentinel.org).

**Overview**

**Request Description**

FDA has requested execution of Modular Program #3 (MP3) to investigate exposure of two anticoagulant medications (dabigatran and warfarin) among members with a pre-existing condition of atrial fibrillation and among members with various pre-existing exclusions. This involved one run of MP3. The time window for the request was October 19, 2010 to December 31, 2012. The package was distributed to 18 Data Partners on November 5, 2013.

Results provide counts of new anticoagulant users, dispensings, total days supplied, eligible members, and member-years for patients. Forty scenarios were examined in total. Please see the Specifications tab for more details on each scenario.

**Table 1a**

Table displaying the Number of New Dabigatran Users, New Episodes, Dispensings, Total Days Supplied, Years at Risk, Eligible Members, Member-Years, New Users per 1,000 Eligible Members, Days Supplied per User, Dispensings per User, and Days Supplied per Dispensing by Pre-Existing Condition Criteria between October 19, 2010 and December 31, 2012

**Table 1b**

Table displaying the Number of New Warfarin Users, New Episodes, Dispensings, Total Days Supplied, Years at Risk, Eligible Members, Member-Years, New Users per 1,000 Eligible Members, Days Supplied per User, Dispensings per User, and Days Supplied per Dispensing by Pre-Existing Condition Criteria between October 19, 2010 and December 31, 2012

**Table 2a**

Table displaying the Number of New Dabigatran Users, New Episodes, Dispensings, Total Days Supplied, Years at Risk, Eligible Members, Member-Years, New Users per 1,000 Eligible Members, Days Supplied per User, Dispensings per User, and Days Supplied per Dispensing by Pre-Existing Condition Criteria and Age Group between October 19, 2010 and December 31, 2012

**Table 2b**

Table displaying the Number of New Warfarin Users, New Episodes, Dispensings, Total Days Supplied, Years at Risk, Eligible Members, Member-Years, New Users per 1,000 Eligible Members, Days Supplied per User, Dispensings per User, and Days Supplied per Dispensing by Pre-Existing Condition Criteria and Age Group between October 19, 2010 and December 31, 2012

**Table 3a**

Table displaying the Number of New Dabigatran Users, New Episodes, Dispensings, Total Days Supplied, Years at Risk, Eligible Members, Member-Years, New Users per 1,000 Eligible Members, Days Supplied per User, Dispensings per User, and Days Supplied per Dispensing by Pre-Existing Condition Criteria and Sex between October 19, 2010 and December 31, 2012

**Table 3b**

Table displaying the Number of New Warfarin Users, New Episodes, Dispensings, Total Days Supplied, Years at Risk, Eligible Members, Member-Years, New Users per 1,000 Eligible Members, Days Supplied per User, Dispensings per User, and Days Supplied per Dispensing by Pre-Existing Condition Criteria and Sex between October 19, 2010 and December 31, 2012

**Table 4a**

Table displaying the Number of New Dabigatran Users, New Episodes, Dispensings, Total Days Supplied, Years at Risk, Eligible Members, Member-Years, New Users per 1,000 Eligible Members, Days Supplied per User, Dispensings per User, and Days Supplied per Dispensing by Pre-Existing Condition Criteria and Year between October 19, 2010 and December 31, 2012

**Table 4b**

Table displaying the Number of New Warfarin Users, New Episodes, Dispensings, Total Days Supplied, Years at Risk, Eligible Members, Member-Years, New Users per 1,000 Eligible Members, Days Supplied per User, Dispensings per User, and Days Supplied per Dispensing by Pre-Existing Condition Criteria and Year between October 19, 2010 and December 31, 2012

**Table 5**

Table displaying Pre-existing Conditions and Prescription Drug Dispensings among Incident Dabigatran and Warfarin Users with Atrial Fibrillation.

**Appendix A**

Table of Procedure and Diagnosis Codes for Pre-existing conditions in this request.

**Notes:**

Please contact the Mini-Sentinel Operations Center (MSOC\_Requests@harvardpilgrim.org) for questions and to provide comments/suggestions for future enhancements to this document.

**Modular Program Specifications for Query MSY5\_MPR10\_v1**

Modular Program #3 will be used to new dabigatran and warfarin episodes among patients with differing groups of pre-existing conditions. In total, 40 different scenarios were examined in this request

<b>Coverage Requirement</b>	Drug and Medical Coverage
<b>Query Period</b>	October 19, 2010 to December 31, 2012.
<b>Enrollment Gap</b>	45 Days
<b>Enrollment Days</b>	183
<b>Age Stratifications</b>	0-40, 41-54, 55-64, 65-74, 75-84, and 85+

Scenario	Drug/Exposure							Pre-Existing Condition					Event/Outcome	
	Incident exposure	Incident w/ respect to:	Ep. Gap	Ep. Ext. Period	Min. Ep. Duration	Min. Days Supplied	Washout (days)	Incidence Type*	Pre-Existing Condition	Include/Exclude	Lookback Start	Lookback End	Care Setting PDX	Event/ Outcome
1	Dabigatran	Dabigatran/Warfarin	10	10	1	1	183	SING	Atrial Fibrillation	Include	-183	-1	All	Dummy
2	Warfarin	Dabigatran/Warfarin	10	10	1	1	183	SING	Atrial Fibrillation	Include	-183	-1	All	Dummy
3	Dabigatran	Dabigatran/Warfarin	10	10	1	1	183	SING	Afib Exclude Chronic Liver Disease	Include	-183	-1	All	Dummy
4	Warfarin	Dabigatran/Warfarin	10	10	1	1	183	SING	Afib Exclude Chronic Liver Disease	Include	-183	-1	All	Dummy

 CPT codes checked against "Optum 2012 Current Procedure Codes & Relative Values Data File" provided by OptumInsight

\*Single incidence type for the exposure will only consider the first incident episode for each user during the query period that satisfies the Washout Period criteria (183 or 365 days). There can be at most  
 \*\*Mult washout type for the event will only consider the first event for each episode that satisfies the Washout Period criteria of 183 days. There can be at most one event per episode and consequently,

### Glossary of Terms in Modular Program 3\*

**Blackout Period** - number of days at the beginning of a treatment episode that events are to be ignored. If an event occurs during the blackout period, the episode is excluded.

**Care Setting** - type of medical encounter or facility where the exposure, event, or condition code was recorded. Possible care settings include: Inpatient Hospital Stay (IP), Non-Acute Institutional Stay (IS), Emergency Department (ED), Ambulatory  
**Days at Risk** - number of days supplied plus any episode gaps and exposure extension periods.

**Eligible Members** - number of members eligible for an incident treatment episode (defined by the drug/exposure and event washout periods) with drug and medical coverage during the query period.

**Enrollment Days** - irrespective of what query incidence type (WASHTYP) is specified, this is an optional parameter to further restrict the number of days of continuous enrollment prior to start of new incident treatment episode to reach a certain minimum. This parameter is used to ensure that appropriate enrollment requirements are met. Since at least washout period days of enrollment must be found prior to index date this minimum enrollment days requirement can only be binding

**Enrollment Gap** - number of days allowed between two consecutive enrollment periods without breaking a "continuously

**Episode Gap** - number of days allowed between two (or more) consecutive exposures (dispensings/procedures) to be

**Exposure Extension Period** - number of days post treatment period in which the outcomes/events are counted for a

**Lookback Period (pre-existing condition)** - number of days wherein a member is required to have evidence of pre-existing condition (diagnosis/procedure/drug dispensing).

**Member-Days** - sum of all days of enrollment with medical and drug coverage\*\* in the query period preceded by an

**Minimum Days Supplied** - specifies a minimum number of days in length of the days supplied for the episode to be

**Minimum Episode Duration** - specifies a minimum number of days in length of the episode for it to be considered

**New Episodes** - new treatment episodes; length of episode is determined by days supplied in one dispensing (or consecutive

**New Users** - number of members with incident exposure during the query period. Member must have no evidence of exposure (s) of interest (defined by incidence criteria) in the prior washout period. A user may only be counted once in a

**Principal Diagnosis** - diagnosis or condition established to be chiefly responsible for admission of the patient to the hospital.

YES will only consider diagnoses flagged as Principal

**Query Period** - period in which the modular program looks for exposures and outcomes of interest.

**Total Days Supplied** - number of days supplied for all dispensings in qualifying treatment episodes.

**Washout Period (drug/exposure)\*\*** - number of days a user is required to have no evidence of prior exposure (drug dispensing/procedure) and continuous drug and medical coverage prior to an incident treatment episode.

**Washout Period (event/outcome)\*\*** - number of days a user is required to have no evidence of a prior event (procedure/diagnosis) and continuous drug and medical coverage prior to an incident treatment episode.

**Incidence Type (drug/exposure)**- *Minimum incidence type* will consider the first treatment episode in the query period as long as it is the first treatment episode in the user's entire available history. *Single* and *Multiple incidence types* will use the washout period to establish incidence, however *Single* will only consider the first treatment episode whereas *Multiple* will

**Incidence Type (event/outcome)**- *Minimum incidence type* considers the first event in a valid episode as long as it is the first event in the user's entire available history. *Multiple incidence type* uses the washout period to establish incidence and considers all qualifying incident treatment episodes. The program will only consider one event per episode, but the *Multiple*

\*all terms may not be used in this report

\*\*incident treatment episodes must be incident to both the exposure and the event

Table 1a. Summary of Incident Dabigatran Use in the MSDD between October 19, 2010 and December 31, 2012, by Pre-Existing Condition Criteria

	New Users	New Episodes	Dispensings	Total Days Supplied	Years at Risk	Eligible Members	Member-Years	New Users / 1K Eligible Members	Days Supplied/ User	Dispensings / User	Days Supplied/ Dispensing
