

# Disclaimer

The following report(s) provides findings from an FDA-initiated query using Sentinel. While Sentinel queries may be undertaken to assess potential medical product safety risks, they may also be initiated for various other reasons. Some examples include determining a rate or count of an identified health outcome of interest, examining medical product use, exploring the feasibility of future, more detailed analyses within Sentinel, and seeking to better understand Sentinel capabilities.

Data obtained through Sentinel are intended to complement other types of evidence such as preclinical studies, clinical trials, postmarket studies, and adverse event reports, all of which are used by FDA to inform regulatory decisions regarding medical product safety. The information contained in this report is provided as part of FDA's commitment to place knowledge acquired from Sentinel in the public domain as soon as possible. Any public health actions taken by FDA regarding products involved in Sentinel queries will continue to be communicated through existing channels.

FDA wants to emphasize that the fact that FDA has initiated a query involving a medical product and is reporting findings related to that query does not mean that FDA is suggesting health care practitioners should change their prescribing practices for the medical product or that patients taking the medical product should stop using it. Patients who have questions about the use of an identified medical product should contact their health care practitioners.

The following report contains a description of the request, request specifications, and results from the modular program run(s).

If you are using a web page screen reader and are unable to access this document, please contact the Sentinel Operations Center for assistance at info@sentinelsystem.org.

#### Overview for Request: cder\_sir\_wp005

Request ID: cder\_sir\_wp005\_nsdp\_v01

**<u>Request Description</u>**: In this report, we performed signal identification by monitoring non-pregnancy and non-cancer outcomes among new users of filgrastim-sndz (Zarxio) and new users of filgrastim (Neupogen).

<u>Sentinel Routine Querying Module</u>: Cohort Identification and Descriptive Analysis (CIDA) module, version 11.3.0, with Propensity Score Analysis and Signal Identification modules.

**Data Source:** We distributed this query to five Sentinel Data Partners on December 9, 2022. The study period included data from November 5, 2016 through distribution date. See Appendix A for a list of dates of available data for each Data Partner. **Study Design:** We identified adults with incident use of filgrastim-sndz or filgrastim among a cohort with no use of non-index biosimilars of filgrastim on index date or in the 365 days prior. We calculated propensity scores (PS) for the two cohorts and matched the users using 1:1 fixed ratio matching. Two sets of PS models were created: one including calendar year and one without. We monitored matched pairs for non-pregnancy and non-cancer outcomes. This is a Type 2 analysis using the Propensity Score Analysis and Signal Identification modules in the Query Request Package (QRP) documentation.

**Exposures of Interest:** Only the first qualifying treatment dispensing or administration of filgrastim-sndz and filgrastim was evaluated. We defined exposures using National Drug Codes (NDCs) and Healthcare Common Procedure Coding System (HCPCS), Level II codes. NDCs were queried in the dispensing and procedure tables in the Sentinel Common Data Model (SCDM) format. See Appendix B for generic and brand names of medical products and Appendix C for HCPCS used to define exposures of interest.

<u>Cohort Eligibility Criteria</u>: We required eligible members to be aged 18 years or older and to be continuously enrolled in health plans with medical and drug coverage for at least 400 days prior to the index date, during which gaps in coverage of up to 45 days were allowed. We defined new use as no evidence of the index-defining exposure in the 365 days prior to index date. We also excluded patients with use of the comparator exposure or to other filgrastim biosimilars and related biological product (Nivestym, Releuko or Granix) on index date or in the 365 days prior to the index date. Exclusion criteria were defined using National Drug Codes (NDCs) and Healthcare Common Procedure Coding System (HCPCS), Level II codes. NDCs were queried in the dispensing and procedure tables in the SCDM format. See Appendix D for generic and brand names of medical products and Appendix E for HCPCS used to define non-exposure exclusion criteria.

**Follow-up Time:** Follow-up began on the day after index dispensing and continued for 183 days or until the first occurrence of any of the following: 1) death, 2) disenrollment, 3) end of the query period, 4) end of Data Partner data, 5) dispensing or administration of opposite study drug, or 6) dispensing or administration of non-study drug filgrastim biosimilars.

**Baseline Characteristics:** PS covariates in a typical signal identification analysis were selected to be general health indicators and thus include concepts in the Centers for Medicare and Medicaid Services (CMS) Chronic Conditions Warehouse (CCW), screenings or other indications of health care seeking behavior, and frailty measures among other characteristics. We assessed the following characteristics on index date and included them in the PS model: continuous age, sex, calendar year, race, ethnicity. As a sensitivity, we ran a secondary PS model without calendar year included but with all other characteristics of the primary PS model remaining the same.

We assessed the following characteristics in the 400 days prior to index date and included them in the PS model: medical and healthcare service utilization; Charlson/Elixhauser combined comorbidity score<sup>1</sup>; acute myocardial infarction (AMI); attention-deficit/hyperactivity disorder (ADHD), conduct disorder, hyperkinetic syndrome; alcohol use disorders; Alzheimer's disease; anemia; anxiety disorders; arrhythmia; asthma; atrial fibrillation and flutter; autoimmune disease; bacterial infection; benign prostatic hyperplasia; breast cancer; colorectal cancer; endometrial cancer; lung cancer; prostate cancer; urologic cancer; cataracts; chemotherapy; chronic kidney disease (CKD); end-stage renal disease (ESRD) or dialysis; coagulopathy; colonoscopy; chronic obstructive pulmonary disease (COPD); cystic fibrosis and other metabolic developmental disorders; degenerative diseases of central nervous system (CNS); depression, bipolar or other depressive mood disorders; diabetes; insulin; anti-diabetics; drug use disorders; durable medical equipment; epilepsy; fecal occult blood test; fibromyalgia, chronic pain, and fatigue; fluid and electrolyte disorder; gallstones; glaucoma;

#### Overview for Request: cder\_sir\_wp005

heart failure and non-ischemic heart disease; hip/pelvic fracture, human immunodeficiency virus (HIV) infection; hyperparathyroidism; hyperlipidemia; hypertension; hypothyroidism; ischemic heart disease; leukemias and lymphomas; liver disease, cirrhosis, and other liver conditions; mammogram; medicines for gout; migraine and chronic headache; mobility impairments; multiple sclerosis and transverse myelitis; muscular dystrophy; non-Alzheimer's dementia; obesity; opioid use disorder; organ transplant; osteoporosis with or without pathological fracture; other infections (mumps, flu/influenza, Herpes, Coxsackie, Epstein-Barr, Cytomegalovirus, Histoplasmosis, Parvovirus B19, Pneumocytosis); oxicam anti-inflammatory drugs; pap smear; Parkinson's disease and secondary Parkinsonism; peripheral vascular disease (PVD); personality disorders; all-cause pneumonia; post-traumatic stress disorder (PTSD); pressure and chronic ulcer; prostate-specific antigen (PSA) test; psychosis; pulmonary circulation disorders; pulmonary disease; renal failure; rheumatoid arthritis/osteoarthritis; schizophrenia and other psychotic disorders; screening examinations and disease management; sensory impairment (deafness and hearing impairment); sertraline; spinal cord injury; stroke/transient ischemic attack; sulfa antibiotics; thrombotic thrombocytopenic purpura; tobacco use; viral hepatitis; weight loss; and mental or physical impairment (intellectual disabilities and related conditions; learning disabilities; mobility impairments; blindness and visual impairment; or deafness and hearing impairment); acute myeloid leukemia; neutropenia; non-myeloid malignancy; myelodysplastic syndrome; pegfilgrastim and its similars (Neulasta, Nyvepria, Ziextenzo, Udenyca, Fulphila).

We assessed the following characteristics on the 30 days prior to index date and included them in the PS model: chemotherapy; bone marrow harvest; bone marrow transplant.

Additionally, the following characteristics were also captured but not included in the PS model. In the 400 days prior to the index date, we collected: autism spectrum disorders; bipolar disorder; cancer (any of breast, colorectal, endometrial, lung, prostate, urologic cancers); any cancer; cerebral palsy; cancer or chemotherapy; CKD or ESRD or dialysis; depressive disorders; diabetes or insulin; diabetes or insulin or anti-diabetics; human papillomavirus (HPV) DNA test; intellectual disabilities and related conditions; Kawasaki disease; learning disabilities; other developmental delays; Reyes syndrome; schizophrenia; sensory impairment (blindness and visual impairment); sickle cell disease; spina bifida and other congenital anomalies of the nervous system; traumatic brain injury and non-psychotic mental disorders due to brain damage. In the 365 days prior to index date, we collected exposure to: filgrastim; filgrastim-sndz. In all patient history prior to index date, we collected exposure to: filgrastim and its biosimilars.

All of these characteristics were defined using NDCs; International Classification of Diseases, Tenth Revision, Clinical Modification (ICD-10-CM) diagnosis codes; ICD-10, Procedure Coding System (ICD-10-PCS) procedure codes; Healthcare Common Procedure Coding System (HCPCS), Level II codes; Current Procedural Terminology, Fourth Edition (CPT-4), Category I; CPT-4, Category II; and CPT-4, Category III codes. NDCs were queried in the dispensing and procedure tables in the SCDM format. See Appendix F for generic and brand names of medical products and Appendix G for diagnosis or procedure codes used to define baseline characteristics.

**Propensity Score Adjustment:** PS was calculated using the baseline characteristics noted above. Matching was performed using 1:1 nearest neighbor matching without replacement on the probability scale using a caliper of 0.025. Two sets of models were created: one adjusting for calendar year and one without.

<u>Outcome Assessment via Signal Identification</u>: Among the 1:1 matched filgrastim and filgrastim-sndz pairs, we evaluated new health outcomes of interest (HOI). We used a hierarchical tree of ICD-10-CM diagnostic codes excluding C00-D49 (Neoplasms), O00-O9A (Pregnancy, childbirth and the puerperium), P00-P96 (Certain conditions originating in the perinatal period), Q00-Q99 (Congenital malformations, deformations, and chromosomal abnormalities), V00-Y99 (External causes of morbidity), and Z00-Z99 (Factors influencing health status and contact with health services).

#### Overview for Request: cder\_sir\_wp005

In our primary analysis, we identified incident HOIs as the first inpatient or emergency department diagnosis to occur in 400 days relative to the date of HOI diagnosis. For an outcome to be considered incident, there were required to be no outcomes with the same first three digits of the ICD-10-CM code in the prior 400 days in any setting. We evaluated incident HOIs beginning one day after exposure initiation until the end of the exposure episode provided that both members of the matched pair were still able to contribute at-risk time for the outcomes of interest. In a sensitivity analysis, we identified the HOIs in any setting (inpatient, emergency department, or ambulatory). All other identification rules remained unchanged. This was done for both of the PS models, resulting in four sets of signal identification results.

<u>Tree-Based Scan Statistic</u>: These data were evaluated via the TreeScan<sup>™</sup> software (v.2.0) to determine whether there were imbalances in outcome occurrence between the two groups that rose to the level of statistical significance. TreeScan<sup>™</sup> is a data-mining software that implements tree-based scan statistics. Under the null hypothesis, there is no position on the tree where outcomes are expected to occur in a ratio other than the fixed match ratio (1:1) of the cohort. We used unconditional Bernoulli tree-based scan statistic to calculate the log likelihood ratio for every 3rd-6th level node of the outcome tree. See Appendix H for calculation of test statistic.

#### Please see Appendices I-K for the specifications of parameters used in this request and a design diagram.

<u>Limitations</u>: Algorithms to define exposures, outcomes, inclusion and exclusion criteria, and covariates are imperfect and may be misclassified. Therefore, data should be interpreted with this limitation in mind.

<u>Notes</u>: Please contact the Sentinel Operations Center (info@sentinelsystem.org) for questions and to provide comments/suggestions for future enhancements to this document. For more information on Sentinel's routine querying modules, please refer to the documentation (https://dev.sentinelsystem.org/projects/SENTINEL/repos/sentinel-routine-querying-tool-documentation/browse).

### Glossary of Terms for Analyses Using Cohort Identification and Descriptive Analysis (CIDA) Module\*

Amount Supplied - number of units (pills, tablets, vials) dispensed. Net amount per NDC per dispensing.

**Blackout Period** - number of days at the beginning of a treatment episode that events are to be ignored. If an event occurs during the blackout period, the episode is excluded.

**Care Setting** - type of medical encounter or facility where the exposure, event, or condition code was recorded. Possible care settings include: Inpatient Hospital Stay (IP), Non-Acute Institutional Stay (IS), Emergency Department (ED), Ambulatory Visit (AV), and Other Ambulatory Visit (OA). For laboratory results, possible care settings include: Emergency Department (E), Home (H), Inpatient (I), Outpatient (O), or Unknown or Missing (U). The Care Setting, along with the Principal Diagnosis Indicator (PDX), forms the Care Setting/PDX parameter.

**Ambulatory Visit (AV)** - includes visits at outpatient clinics, same-day surgeries, urgent care visits, and other same-day ambulatory hospital encounters, but excludes emergency department encounters.

**Emergency Department (ED)** - includes ED encounters that become inpatient stays (in which case inpatient stays would be a separate encounter). Excludes urgent care visits.

**Inpatient Hospital Stay (IP)** - includes all inpatient stays, same-day hospital discharges, hospital transfers, and acute hospital care where the discharge is after the admission date.

**Non-Acute Institutional Stay (IS)** - includes hospice, skilled nursing facility (SNF), rehab center, nursing home, residential, overnight non-hospital dialysis and other non-hospital stays.

**Other Ambulatory Visit (OA)** - includes other non overnight AV encounters such as hospice visits, home health visits, skilled nursing facility visits, other non-hospital visits, as well as telemedicine, telephone and email consultations.

**Charlson/Elixhauser Combined Comorbidity Score** - calculated based on comorbidities observed during a requester-defined window around the exposure episode start date (e.g., in the 183 days prior to index).

**Code Days** - the minimum number of times the diagnosis must be found during the evaluation period in order to fulfill the algorithm to identify the corresponding patient characteristic.

**Cohort Definition (drug/exposure)** - indicates how the cohort will be defined: 01: Cohort includes only the first valid treatment episode during the query period; 02: Cohort includes all valid treatment episodes during the query period; 03: Cohort includes all valid treatment episodes during the query period until an event occurs.

**Computed Start Marketing Date -** represents the first observed dispensing date among all valid users within a GROUP (scenario) within each Data Partner site.

Days Supplied - number of days supplied for all dispensings in qualifying treatment episodes.

**Eligible Members** - number of members eligible for an incident treatment episode (defined by the drug/exposure and event washout periods) with drug and medical coverage during the query period.

**Enrollment Gap** - number of days allowed between two consecutive enrollment periods without breaking a "continuously enrolled" sequence.

**Episodes** - treatment episodes; length of episode is determined by days supplied in one dispensing or consecutive dispensings bridged by the episode gap.

**Episode Gap** - number of days allowed between two (or more) consecutive exposures (dispensings/procedures) to be considered the same treatment episode.

**Event Deduplication** - specifies how events are counted by the Modular Program (MP) algorithm: 0: Counts all occurrences of a health outcome of interest (HOI) during an exposure episode; 1: de-duplicates occurrences of the same HOI code and code type on the same day; 2: de-duplicates occurrences of the same HOI group on the same day (e.g., de-duplicates at the group level). **Exposure Episode Length** - number of days after exposure initiation that is considered "exposed time."

**Exposure Extension Period** - number of days post treatment period in which the outcomes/events are counted for a treatment episode. Extensions are added after any episode gaps have been bridged.

**Lookback Period** - number of days wherein a member is required to have evidence of pre-existing condition (diagnosis/procedure/drug dispensing).

**Maximum Episode Duration -** truncates exposure episodes after a requester-specified number of exposed days. Applied after any gaps are bridged and extension days added to the length of the exposure episode.

**Member-Years** - sum of all days of enrollment with medical and drug coverage in the query period preceded by an exposure washout period all divided by 365.25.

**Minimum Days Supplied** - specifies a minimum number of days in length of the days supplied for the episode to be considered. **Minimum Episode Duration** - specifies a minimum number of days in length of the episode for it to be considered. Applied after any gaps are bridged and extension days added to the length of the exposure episode.

**Monitoring Period** - used to define time periods of interest for both sequential analysis and simple cohort characterization requests.

**Principal Diagnosis (PDX)** - diagnosis or condition established to be chiefly responsible for admission of the patient to the hospital. 'P' = principal diagnosis, 'S' = secondary diagnosis, 'X' = unspecified diagnosis, '.' = blank. Along with the Care Setting values, forms the Caresetting/PDX parameter.

Query Period - period in which the modular program looks for exposures and outcomes of interest.

**Switch Evaluation Step Value -** value used to differentiate evaluation step. Each switch pattern can support up to 2 evaluation steps (0 = switch pattern evaluation start; 1 = first evaluation; 2 = second evaluation).

**Switch Gap Inclusion Indicator - i**ndicator for whether gaps in treatment episodes that are included in a switch episode will be counted as part of the switch episode duration.

**Switch Pattern Cohort Inclusion Date** - indicates which date to use for inclusion into the switch pattern cohort of interest as well as optionally as the index date of the treatment episode initiating the switch pattern. Valid options are the product approval date, product marketing date, other requester defined date, or computed start marketing date.

**Switch Pattern Cohort Inclusion Strategy** - indicates how the switch pattern cohort inclusion date will be used: 01: used only as a switch cohort entry date. First treatment episode dispensing date is used as index for computing time to first switch; 02: used as switch cohort entry date and as initial switch step index date for computing time to first switch.

**Treatment Episode Truncation Indicator** - indicates whether the exposure episode will be truncated at the occurrence of a requester-specified code.

Washout Period (drug/exposure) - number of days a user is required to have no evidence of prior exposure (drug

dispensing/procedure) and continuous drug and medical coverage prior to an incident treatment episode.

**Washout Period (event/outcome)** - number of days a user is required to have no evidence of a prior event (procedure/diagnosis) and continuous drug and medical coverage prior to an incident treatment episode.

Years at Risk - number of days supplied plus any episode gaps and exposure extension periods all divided by 365.25.

\*all terms may not be used in this report

# Glossary of Terms for Analyses Using Propensity Score Analysis (PSA) Module\*

**Covariate** - requester defined binary variable to include in the propensity score estimation model (e.g., diabetes, heart failure, etc.) during requester-defined lookback period. Requester may also choose to add any of the following categorical, continuous, or count

- 1. Age (continuous)
- 2. Sex
- 3. Time period (i.e., monitoring period for sequential analyses)
- 4. Year of exposure
- 5. Comorbidity score
- 6. Medical utilization number of inpatient stays
- 7. Medical utilization number of institutional stays
- 8. Medical utilization number of emergency department visits
- 9. Medical utilization number of outpatient visits
- 10. Health care utilization number of other ambulatory encounters (e.g., telemedicine, email consults)
- 11. Drug utilization number of dispensings
- 12. Drug utilization number of unique generics dispensed

**Covariate Evaluation Window** - specified number of days relative to index date to evaluate the occurrence of covariates of interest. Note: members are required to have continuous enrollment during the covariate evaluation window, regardless of the value **Individual Level Data Return** - program may return individual-level, de-identified datasets to the Sentinel Operations Center (SOC). While the datasets contain a single row per patient for each specified analysis, patient identifiers such as a patient ID are not included in the output. Individual-level datasets are returned to the SOC, aggregated, and used to calculate effect estimates via Cox **Mahalanobis Distance** - provides a measure of balance across all variables while accounting for their correlation. **Matching Caliner** - maximum allowed difference in propensity scores between treatment and control natients. Bequester may

**Matching Caliper** - maximum allowed difference in propensity scores between treatment and control patients. Requester may select any caliper (e.g., 0.01, 0.025, and 0.05).

Matching Ratio - patients in exposed and comparator groups are nearest neighbor matched by a 1:1 or 1:n (up to 10) matching

Matched Conditional and Unconditional Analysis - in a conditional matched analysis, a Cox model, stratified by Data Partner site and matched set, is run on the matched population. This can be done for both the both 1:1 and 1:n matched cohorts. In an unconditional analysis, a Cox model, stratified by Data Partner site only, is run on the matched population. This can be done for the **Propensity Score Stratification** - option to stratify propensity scores based on requester-defined percentiles in the unmatched population. In a stratified analysis, a Cox model, stratified by Data Partner site, is run on the stratified population. Note that all **PSM Tool** - performs effect estimation by comparing exposure propensity-score matched parallel new user cohorts. Propensity score estimation and matching are conducted within each Sentinel Data Partner site via distributed programming code; data are **Risk-set Level Data Return** - alternative to the patient-level data return approach. In this approach, the PSM tool will produce deidentified, risk-set level datasets instead of or in addition to individual-level output. Whereas each observation in the patient-level datasets represents one patient in the cohort, each observation in the risk set dataset represents one event. Risk sets are created at the Data Partner site, returned to the SOC, aggregated, and used to calculate effect estimates via case-centered logistic regression. **Subgroup Analysis** - may be conducted using any requester-defined covariates. Subgroup analyses may be performed in the **Zero Cell Correction** - indicator for whether to screen variables with a zero correction added to each cell in the confounder/outcome 2x2 table. Recommended when the number of exposed outcomes is fewer than 150.

<sup>1</sup>Covariates in blue show a standardized difference greater than 0.1.

<sup>2</sup>Covariates in italics were not included in the propensity score logistic regression model.

<sup>3</sup>Value represents standard deviation where no % follows the value.

<sup>4</sup>Race data may not be completely populated at all Data Partners; therefore, data about race may be incomplete.

<sup>5</sup>The Charlson/Elixhauser Combined Comorbidity Score is calculated based on comorbidities observed during a requester-defined window around the exposure episode start date. (Gagne JJ, Glynn RJ, Avorn J, Levin R, Schneeweiss S. A combined comorbidity score predicted mortality in elderly patients better than existing scores. J Clin Epidemiol. 2011;64(7):749-759)

<sup>1</sup>Covariates in blue show a standardized difference greater than 0.1.

<sup>2</sup>Covariates in italics were not included in the propensity score logistic regression model.

<sup>3</sup>Value represents standard deviation where no % follows the value.

<sup>4</sup>Race data may not be completely populated at all Data Partners; therefore, data about race may be incomplete.

<sup>5</sup>The Charlson/Elixhauser Combined Comorbidity Score is calculated based on comorbidities observed during a requester-defined window around the exposure episode start date. (Gagne JJ, Glynn RJ, Avorn J, Levin R, Schneeweiss S. A combined comorbidity score predicted mortality in elderly patients better than existing scores. J Clin Epidemiol. 2011;64(7):749-759)

<sup>1</sup>Covariates in blue show a standardized difference greater than 0.1.

<sup>2</sup>Covariates in italics were not included in the propensity score logistic regression model.

<sup>3</sup>Value represents standard deviation where no % follows the value.

<sup>4</sup>Race data may not be completely populated at all Data Partners; therefore, data about race may be incomplete.

<sup>5</sup>The Charlson/Elixhauser Combined Comorbidity Score is calculated based on comorbidities observed during a requester-defined window around the exposure episode start date. (Gagne JJ, Glynn RJ, Avorn J, Levin R, Schneeweiss S. A combined comorbidity score predicted mortality in elderly patients better than existing scores. J Clin Epidemiol. 2011;64(7):749-759)

\*\*\*\*\*Data are not presented in these cells due to a small sample size or to assure a small cell cannot be recalculated through the cells presented.

| Code     | Description   | Category  | Code Type |
| T81.512D | Adhesions due to foreign body accidentally left in body following kidney dialysis, subsequent encounter       | Diagnosis | ICD-10-CM |
| T81.512S | Adhesions due to foreign body accidentally left in body following kidney dialysis, sequela                    | Diagnosis | ICD-10-CM |
| T81.522  | Obstruction due to foreign body accidentally left in body following kidney dialysis                           | Diagnosis | ICD-10-CM |
| T81.522A | Obstruction due to foreign body accidentally left in body following kidney dialysis, initial encounter        | Diagnosis | ICD-10-CM |
| T81.522D | Obstruction due to foreign body accidentally left in body following kidney dialysis, subsequent encounter     | Diagnosis | ICD-10-CM |
| T81.522S | Obstruction due to foreign body accidentally left in body following kidney dialysis, sequela                  | Diagnosis | ICD-10-CM |
| T81.532  | Perforation due to foreign body accidentally left in body following kidney dialysis                           | Diagnosis | ICD-10-CM |
| T81.532A | Perforation due to foreign body accidentally left in body following kidney dialysis, initial encounter        | Diagnosis | ICD-10-CM |
| T81.532D | Perforation due to foreign body accidentally left in body following kidney dialysis, subsequent encounter     | Diagnosis | ICD-10-CM |
| T81.532S | Perforation due to foreign body accidentally left in body following kidney dialysis, sequela                  | Diagnosis | ICD-10-CM |
| T81.592  | Other complications of foreign body accidentally left in body following kidney dialysis                       | Diagnosis | ICD-10-CM |
| T81.592A | Other complications of foreign body accidentally left in body following kidney dialysis, initial encounter    | Diagnosis | ICD-10-CM |
| T81.592D | Other complications of foreign body accidentally left in body following kidney dialysis, subsequent encounter | Diagnosis | ICD-10-CM |
| T81.592S | Other complications of foreign body accidentally left in body following kidney dialysis, sequela              | Diagnosis | ICD-10-CM |
| T82.41XA | Breakdown (mechanical) of vascular dialysis catheter, initial encounter                                       | Diagnosis | ICD-10-CM |
| T82.41XD | Breakdown (mechanical) of vascular dialysis catheter, subsequent encounter                                    | Diagnosis | ICD-10-CM |
| T82.41XS | Breakdown (mechanical) of vascular dialysis catheter, sequela   | Diagnosis | ICD-10-CM |
| T82.42XA | Displacement of vascular dialysis catheter, initial encounter   | Diagnosis | ICD-10-CM |
| T82.42XD | Displacement of vascular dialysis catheter, subsequent encounter  | Diagnosis | ICD-10-CM |
| T82.42XS | Displacement of vascular dialysis catheter, sequela   | Diagnosis | ICD-10-CM |
| T82.43XA | Leakage of vascular dialysis catheter, initial encounter  | Diagnosis | ICD-10-CM |
| T82.43XD | Leakage of vascular dialysis catheter, subsequent encounter   | Diagnosis | ICD-10-CM |
| T82.43XS | Leakage of vascular dialysis catheter, sequela  | Diagnosis | ICD-10-CM |
| T82.49XA | Other complication of vascular dialysis catheter, initial encounter   | Diagnosis | ICD-10-CM |
| T82.49XD | Other complication of vascular dialysis catheter, subsequent encounter  | Diagnosis | ICD-10-CM |
| T82.49XS | Other complication of vascular dialysis catheter, sequela   | Diagnosis | ICD-10-CM |
| T85.611  | Breakdown (mechanical) of intraperitoneal dialysis catheter   | Diagnosis | ICD-10-CM |

|          |  | Code      |           |
|----------|--|-----------|-----------|
| Code     | Description  | Category  | Code Type |
| T85.611A | Breakdown (mechanical) of intraperitoneal dialysis catheter, initial encounter   | Diagnosis | ICD-10-CM |
| T85.611D | Breakdown (mechanical) of intraperitoneal dialysis catheter, subsequent encounter  | Diagnosis | ICD-10-CM |
| T85.611S | Breakdown (mechanical) of intraperitoneal dialysis catheter, sequela   | Diagnosis | ICD-10-CM |
| T85.621  | Displacement of intraperitoneal dialysis catheter  | Diagnosis | ICD-10-CM |
| T85.621A | Displacement of intraperitoneal dialysis catheter, initial encounter   | Diagnosis | ICD-10-CM |
| T85.621D | Displacement of intraperitoneal dialysis catheter, subsequent encounter  | Diagnosis | ICD-10-CM |
| T85.621S | Displacement of intraperitoneal dialysis catheter, sequela   | Diagnosis | ICD-10-CM |

| 3E063VG              | Introduction of Insulin into Central Artery, Percutaneous Approach   | Procedure             | ICD-10-PCS             |
| 43755                | Gastric intubation and aspiration, diagnostic; collection of multiple fractional specimens with gastric stimulation, single or<br>double lumen tube (gastric secretory study) (eg, histamine, insulin, pentagastrin, calcium, secretin), includes drug<br>administration | Procedure             | CPT-4                  |
| 80422                | Glucagon tolerance panel; for insulinoma This panel must include the following: Glucose (82947 x 3) Insulin (83525 x 3)  | Procedure             | CPT-4                  |
| 80434                | Insulin tolerance panel; for ACTH insufficiency This panel must include the following: Cortisol (82533 x 5) Glucose (82947 x 5)  | Procedure             | CPT-4                  |
| 80435                | Insulin tolerance panel; for growth hormone deficiency This panel must include the following: Glucose (82947 x 5) Human growth hormone (HGH) (83003 x 5)   | Procedure             | CPT-4                  |
| 81506                | Endocrinology (type 2 diabetes), biochemical assays of seven analytes (glucose, HbA1c, insulin, hs-CRP, adiponectin, ferritin,<br>interleukin 2-receptor alpha), utilizing serum or plasma, algorithm reporting a risk score   | Procedure             | CPT-4                  |
| 83525                | Insulin; total   | Procedure             | CPT-4                  |
| 83526                | INSULIN TOLERANCE TEST   | Procedure             | CPT-4                  |
| 83527                | Insulin; free  | Procedure             | CPT-4                  |
| 83530                | Inulin Clearance   | Procedure             | CPT-4                  |

|       |  | Code      |           |
|-------|--|-----------|-----------|
| Code  | Description  | Category  | Code Type |
| 84206 | Proinsulin   | Procedure | CPT-4     |
| 86337 | Insulin antibodies   | Procedure | CPT-4     |
| 86338 | Insulin Factor Antibodies, Ria   | Procedure | CPT-4     |
| 91052 | Gastric analysis test with injection of stimulant of gastric secretion (eg, histamine, insulin, pentagastrin, calcium and secretin)  | Procedure | CPT-4     |
| 95180 | Rapid desensitization procedure, each hour (eg, insulin, penicillin, equine serum)   | Procedure | CPT-4     |
| A4221 | Supplies for maintenance of noninsulin drug infusion catheter, per week (list drugs separately)  | Procedure | HCPCS     |
| A4224 | Supplies for maintenance of insulin infusion catheter, per week  | Procedure | HCPCS     |
| A4225 | Supplies for external insulin infusion pump, syringe type cartridge, sterile, each   | Procedure | HCPCS     |
| A4226 | Supplies for maintenance of insulin infusion pump with dosage rate adjustment using therapeutic continuous glucose sensing,<br>per week  | Procedure | HCPCS     |
| A4230 | Infusion set for external insulin pump, nonneedle cannula type   | Procedure | HCPCS     |
| A4231 | Infusion set for external insulin pump, needle type  | Procedure | HCPCS     |
| A4232 | Syringe with needle for external insulin pump, sterile, 3 cc   | Procedure | HCPCS     |
| A9274 | External ambulatory insulin delivery system, disposable, each, includes all supplies and accessories   | Procedure | HCPCS     |
| E0784 | External ambulatory infusion pump, insulin   | Procedure | HCPCS     |
| E0787 | External ambulatory infusion pump, insulin, dosage rate adjustment using therapeutic continuous glucose sensing  | Procedure | HCPCS     |
| G9147 | Outpatient Intravenous Insulin Treatment (OIVIT) either pulsatile or continuous, by any means, guided by the results of measurements for: respiratory quotient; and/or, urine urea nitrogen (UUN); and/or, arterial, venous or capillary glucose; and/or potassium concentration | Procedure | HCPCS     |
| J1815 | Injection, insulin, per 5 units  | Procedure | HCPCS     |
| J1817 | Insulin for administration through DME (i.e., insulin pump) per 50 units   | Procedure | HCPCS     |
| J1820 | Injection, insulin, up to 100 units  | Procedure | HCPCS     |
| K0548 | Injection, insulin lispro, up to 50 units  | Procedure | HCPCS     |
| K0552 | Supplies for external noninsulin drug infusion pump, syringe type cartridge, sterile, each   | Procedure | HCPCS     |

|        |   | Code      |           |

| K0046 | Elevating legrest, lower extension tube, replacement only, each  | Procedure | HCPCS     |
| K0047 | Elevating legrest, upper hanger bracket, replacement only, each  | Procedure | HCPCS     |
| K0048 | Elevating legrest, complete assembly   | Procedure | HCPCS     |
| K0049 | Calf pad, each   | Procedure | HCPCS     |
| K0050 | Ratchet assembly, replacement only   | Procedure | HCPCS     |
| K0051 | Cam release assembly, footrest or legrest, replacement only, each  | Procedure | HCPCS     |
| K0052 | Swingaway, detachable footrests, replacement only, each  | Procedure | HCPCS     |
| K0053 | Elevating footrests, articulating (telescoping), each  | Procedure | HCPCS     |
| K0054 | Seat width of 10, 11, 12, 15, 17, or 20 inches for a high-strength, lightweight or ultralightweight wheelchair                 | Procedure | HCPCS     |
| K0055 | Seat depth of 15, 17, or 18 inches for a high strength, lightweight or ultralightweight wheelchair                             | Procedure | HCPCS     |
| K0056 | Seat height less than 17 in or equal to or greater than 21 in for a high-strength, lightweight, or ultralightweight wheelchair | Procedure | HCPCS     |
| K0057 | Seat width 19 or 20 inches for heavy duty or extra heavy-duty chair  | Procedure | HCPCS     |
| K0058 | Seat depth 17 or 18 inches for a motorized/power wheelchair  | Procedure | HCPCS     |
| K0059 | Plastic coated handrim, each   | Procedure | HCPCS     |
| K0060 | Steel handrim, each  | Procedure | HCPCS     |
| K0061 | Aluminum handrim, each   | Procedure | HCPCS     |
|       |  |           |           |

|       |  | Code      |           |
|-------|--|-----------|-----------|
| Code  | Description  | Category  | Code Type |
| K0062 | Handrim with 8 to 10 vertical or oblique projections, each                                   | Procedure | HCPCS     |
| K0063 | Handrim with 12 to 16 vertical or oblique projections, each                                  | Procedure | HCPCS     |
| K0064 | Zero pressure tube (flat free insert), any size, each  | Procedure | HCPCS     |
| K0065 | Spoke protectors, each   | Procedure | HCPCS     |
| K0066 | Solid tire, any size, each   | Procedure | HCPCS     |
| K0067 | Pneumatic tire, any size, each   | Procedure | HCPCS     |
| K0068 | Pneumatic tire tube, each  | Procedure | HCPCS     |
| K0069 | Rear wheel assembly, complete, with solid tire, spokes or molded, replacement only, each     | Procedure | HCPCS     |
| K0070 | Rear wheel assembly, complete, with pneumatic tire, spokes or molded, replacement only, each | Procedure | HCPCS     |
| K0071 | Front caster assembly, complete, with pneumatic tire, replacement only, each                 | Procedure | HCPCS     |
| K0072 | Front caster assembly, complete, with semipneumatic tire, each                               | Procedure | HCPCS     |
| K0073 | Caster pin lock, each  | Procedure | HCPCS     |
| K0074 | Pneumatic caster tire, any size, each  | Procedure | HCPCS     |
| K0075 | Semipneumatic caster tire, any size, each  | Procedure | HCPCS     |
| K0076 | Solid caster tire, any size, each  | Procedure | HCPCS     |
| K0077 | Front caster assembly, complete, with solid tire, each                                       | Procedure | HCPCS     |
| K0078 | Pneumatic caster tire tube, each   | Procedure | HCPCS     |
| K0079 | Wheel lock extension, pair   | Procedure | HCPCS     |
| K0080 | Antirollback device, pair  | Procedure | HCPCS     |
| K0081 | Wheel lock assembly, complete, each  | Procedure | HCPCS     |
| K0082 | 22 NF non-sealed lead acid battery, each   | Procedure | HCPCS     |
| K0083 | 22 NF sealed lead acid battery, each (e.g., gel cell, absorbed glass mat)                    | Procedure | HCPCS     |
| K0084 | Group 24 non-sealed lead acid battery, each  | Procedure | HCPCS     |
| K0085 | Group 24 sealed lead acid battery, each (e.g., gel cell, absorbed glass mat)                 | Procedure | HCPCS     |
| K0086 | U-1 non-sealed lead acid battery, each   | Procedure | HCPCS     |
| K0087 | U-1 sealed lead acid battery, each (e.g., gel cell, absorbed glass mat)                      | Procedure | HCPCS     |
| K0088 | Battery charger, single mode, for use with only one battery type, sealed or non-sealed       | Procedure | HCPCS     |

|       |   | Code      |           |
|-------|---|-----------|-----------|
| Code  | Description   | Category  | Code Type |
| K0089 | Battery charger, dual mode, for use with either battery type, sealed or non-sealed  | Procedure | HCPCS     |
| K0090 | Rear wheel tire for power wheelchair, any size, each  | Procedure | HCPCS     |
| K0091 | Rear wheel tire tube other than zero pressure for power wheelchair, any size, each  | Procedure | HCPCS     |
| K0092 | Rear wheel assembly for power wheelchair, complete, each  | Procedure | HCPCS     |
| K0093 | Rear wheel zero pressure tire tube (flat free insert) for power wheelchair, any size, each  | Procedure | HCPCS     |
| K0094 | Wheel tire for power base, any size, each   | Procedure | HCPCS     |
| K0095 | Wheel tire tube other than zero pressure for each base, any size, each  | Procedure | HCPCS     |
| K0096 | Wheel assembly for power base, complete, each   | Procedure | HCPCS     |
| K0097 | Wheel zero-pressure tire tube (flat free insert) for power base, any size, each   | Procedure | HCPCS     |
| K0098 | Drive belt for power wheelchair, replacement only   | Procedure | HCPCS     |
| K0099 | Front caster for power wheelchair, each   | Procedure | HCPCS     |
| K0100 | Wheelchair adapter for amputee, pair  | Procedure | HCPCS     |
| K0101 | One-arm drive attachment, each  | Procedure | HCPCS     |
| K0102 | Crutch and cane holder, each  | Procedure | HCPCS     |
| K0103 | Transfer board, less than 25 inches   | Procedure | HCPCS     |
| K0104 | Cylinder tank carrier, each   | Procedure | HCPCS     |
| K0105 | IV hanger, each   | Procedure | HCPCS     |
| K0106 | Arm trough, each  | Procedure | HCPCS     |
| K0107 | Wheelchair tray   | Procedure | HCPCS     |
| K0108 | Wheelchair component or accessory, not otherwise specified  | Procedure | HCPCS     |
| K0109 | Customization of wheelchair base frame (option or accessory)  | Procedure | HCPCS     |
| K0112 | Trunk support device, vest type, with inner frame, prefabricated  | Procedure | HCPCS     |
| K0113 | Trunk support device, vest type, without inner frame, prefabricated   | Procedure | HCPCS     |
| K0114 | Back support system for use with a wheelchair, with inner frame, prefabricated  | Procedure | HCPCS     |
| K0115 | Seating system, back module, posterior-lateral control, with or without lateral supports, custom fabricated for attachment to wheelchair base | Procedure | HCPCS     |
| K0116 | Seating system, combined back and seat module, custom fabricated for attachment to wheelchair base  | Procedure | HCPCS     |

| 47147 | Backbench reconstruction of cadaver or living donor liver graft prior to allotransplantation; arterial anastomosis, each  | Procedure | CPT-4     |
| 48160 | Pancreatectomy, total or subtotal, with autologous transplantation of pancreas or pancreatic islet cells  | Procedure | CPT-4     |
| 48550 | Donor pancreatectomy (including cold preservation), with or without duodenal segment for transplantation  | Procedure | CPT-4     |
| 48551 | Backbench standard preparation of cadaver donor pancreas allograft prior to transplantation, including dissection of allograft from surrounding soft tissues, splenectomy, duodenotomy, ligation of bile duct, ligation of mesenteric vessels, and Y-graft arterial anastomoses from iliac artery to superior mesenteric artery and to splenic artery | Procedure | CPT-4     |
| 48552 | Backbench reconstruction of cadaver donor pancreas allograft prior to transplantation, venous anastomosis, each   | Procedure | CPT-4     |
| 48554 | Transplantation of pancreatic allograft   | Procedure | CPT-4     |
| 48556 | Removal of transplanted pancreatic allograft  | Procedure | CPT-4     |
| 50300 | Donor nephrectomy, with preparation and maintenance of allograft, from cadaver donor, unilateral or bilateral   | Procedure | CPT-4     |
| 50320 | Donor nephrectomy (including cold preservation); open, from living donor  | Procedure | CPT-4     |
| 50323 | Backbench standard preparation of cadaver donor renal allograft prior to transplantation, including dissection and removal of<br>perinephric fat, diaphragmatic and retroperitoneal attachments, excision of adrenal gland, and preparation of ureter(s), renal<br>vein(s), and renal artery(s), ligating branches, as necessary                      | Procedure | CPT-4     |
| 50325 | Backbench standard preparation of living donor renal allograft (open or laparoscopic) prior to transplantation, including<br>dissection and removal of perinephric fat and preparation of ureter(s), renal vein(s), and renal artery(s), ligating branches, as<br>necessary   | Procedure | CPT-4     |
| 50327 | Backbench reconstruction of cadaver or living donor renal allograft prior to transplantation; venous anastomosis, each  | Procedure | CPT-4     |
| 50328 | Backbench reconstruction of cadaver or living donor renal allograft prior to transplantation; arterial anastomosis, each  | Procedure | CPT-4     |

#### Appendix H. Calculation of the Test Statistic for Unconditional Bernoulli Probability

The log likelihood ratio (LLR) based test statistic T can be calculated as: Where: T = unconditional Bernoulli tree-based scan statistic

- $C_{G}$  = cases in the treatment group for a given node G
- $n_{G}$  = cases in the reference group for a given node G
- p = probability of being in the treatment group

(for 1:1 matched pairs, this is 0.5)

G = node of interest

$$LLR(G) = ln \left( \frac{\left(\frac{c_G}{c_G + n_G}\right)^{c_G} \left(\frac{n_G}{c_G + n_G}\right)^{n_G}}{(p)^{c_G} (1 - p)^{n_G}} \right) I \left(\frac{c_G}{c_G + n_G} > p\right)$$
$$T = \max_G LLR(G)$$

<sup>1</sup>Expression in blue: This is the maximum likelihood estimation. It takes the form of a Bernoulli probability model. The numerator of the equation is based on the observed data. The denominator of the equation is based on the expectation under the null hypothesis. If the observed data "fit" the pattern of the null hypothesis, then this expression would be 1. The "log" of the function is for mathematical convenience. The In (1) = 0.

<sup>2</sup>Expression in green: This is an indication function. It means that a log-likelihood ratio (LLR) is ONLY recorded if there are more cases in the treatment group (ACEI) than expected. So, a LLR is only calculated among nodes on the tree when the LLR would normally exceed 0 (or the likelihood ratio would exceed 1).

<sup>3</sup>Expression in red: The Log Likelihood Ratio is calculated for every position (node) on the tree including each individual diagnosis code and groupings of codes. For any dataset (i.e., across all nodes of the tree), the test statistic for that dataset is the maximum across all the nodes.

| <sup>1</sup> Index start date identifies the date on wh  | ich patients may begin contribute eligible index exposures/events. Data prior to the index start date may |
| be used to determine enrollment, washou                  | it, and other cohort inclusion criteria.  |
| <sup>2</sup> The query will establish a fixed risk winde | ow analysis.  |

<sup>3</sup>TreeScan software will be used to evaluate signal identification.

ICD-10-CM, HCPCS, and CPT codes are provided by Optum360. ICD-10-CM codes were mapped from ICD-9-CM codes using the Centers for Medicare and Medicaid Services General Equivalence Mappings. NDC codes are checked against First Data Bank's "National Drug Data File (NDDF®) Plus."
