

Disclaimer

The following report(s) provides findings from an FDA-initiated query using Sentinel. While Sentinel queries may be undertaken to assess potential medical product safety risks, they may also be initiated for various other reasons. Some examples include determining a rate or count of an identified health outcome of interest, examining medical product use, exploring the feasibility of future, more detailed analyses within Sentinel, and seeking to better understand Sentinel capabilities.

Data obtained through Sentinel are intended to complement other types of evidence such as preclinical studies, clinical trials, postmarket studies, and adverse event reports, all of which are used by FDA to inform regulatory decisions regarding medical product safety. The information contained in this report is provided as part of FDA's commitment to place knowledge acquired from Sentinel in the public domain as soon as possible. Any public health actions taken by FDA regarding products involved in Sentinel queries will continue to be communicated through existing channels.

FDA wants to emphasize that the fact that FDA has initiated a query involving a medical product and is reporting findings related to that query does not mean that FDA is suggesting health care practitioners should change their prescribing practices for the medical product or that patients taking the medical product should stop using it. Patients who have questions about the use of an identified medical product should contact their health care practitioners.

The following report contains a description of the request, request specifications, and results from the modular program run(s).

If you are using a web page screen reader and are unable to access this document, please contact the Sentinel Operations Center for assistance at info@sentinelssystem.org.

Overview for Request: cder_mpl1p_wp112

Request ID: cder_mpl1p_wp112

Request Description: In this report, we examined counts of females with etonogestrel implant insertions and removals by provider specialty and year in the Sentinel Distributed Database (SDD) and reported distribution of exposure codes among those females.

Sentinel Routine Querying Module: Cohort Identification and Descriptive Analysis (CIDA) module, version 14.2.1, with custom programming

Data Source: We distributed this request to 12 Sentinel Data Partners on September 12, 2025 and to two additional Sentinel Data Partners on December 23, 2025. Medical and drug coverage from the Center for Medicare and Medicaid Services - Medicaid Data was included. The study period included data from January 1, 2015, through May 31, 2025. Please see Appendix A for a list of dates of available data for each Data Partner.

Study Design: We identified females with any use of etonogestrel implants, etonogestrel implant insertions, or etonogestrel implant removals among cohorts of individuals between 12 and 54 years of age with a value of "Female" in the Sentinel Common Data Model "SEX" variable. We stratified the results by year, provider specialty, and provider specialty year. We created nine cohorts with varying definitions to identify any etonogestrel implant insertion or removal as follows:

1. **Any evidence of etonogestrel implant or general drug implant insertion:** Index on etonogestrel implant (National Drug Codes (NDCs)/Healthcare Common Procedure Coding System (HCPCS)) or general drug implant insertion (Current Procedural Terminology, Fourth Edition (CPT-4)) with no additional cohort criteria applied.
2. **Etonogestrel implant:** Index on etonogestrel implant (NDC/HCPCS) with no additional cohort criteria applied.
3. **Etonogestrel implant with any insertion:** Index on etonogestrel implant (NDC/HCPCS) and require an "insertion" or "removal + reinsertion" (CPT-4) on the same day.
4. **Etonogestrel implant with insertion only:** Index on etonogestrel implant (NDC/HCPCS) and require an "insertion" (CPT-4) on the same day.
5. **Implant insertion with etonogestrel ever:** Index on "insertion" or "removal + reinsertion" (CPT-4) and require etonogestrel implant (NDC/HCPCS) ever in data.
6. **Etonogestrel implant with any removal:** Index on etonogestrel implant (NDC/HCPCS) and require "removal" or "removal + reinsertion" (CPT-4) on the same day.
7. **Etonogestrel implant with removal only:** Index on etonogestrel implant (NDC/HCPCS) and require "removal" (CPT-4) on the same day.
8. **Implant removal with prior etonogestrel:** Index on "removal" or "removal + reinsertion" (CPT-4) and require etonogestrel implant (NDC/HCPCS) ever prior to and including the index date.
9. **Etonogestrel implant with removal + reinsertion:** Index on etonogestrel implant (NDC/HCPCS) and require "removal + reinsertion" (CPT-4) on the same day.

This is a Type 1 analysis in the Query Request Package (QRP) documentation.

Exposures of Interest: We created cohorts to identify etonogestrel implants using two different index-defining exposures. In cohorts 1-4, 6-7, and 9, the index exposure was an etonogestrel implant, identified using NDCs and HCPCS codes. In cohorts 5 and 8, the index exposure was a general drug implant insertions or removal, identified using CPT-4 codes. All qualifying dispensings or procedures involving etonogestrel implants, implant insertions, or implant removals (index criteria) were identified; cohort re-entry was allowed. Please see Appendix B for a list of generic and brand names of medical products, and Appendix C for a list of HCPCS and CPT-4 codes used to define exposures in this request.

Please see Appendix D for a list of generic and brand names of medical products, and Appendix E for a list of HCPCS and CPT-4 codes used to define inclusion criteria in this request.

Overview for Request: cder_mpl1p_wp112

Cohort Eligibility Criteria: We required members to be enrolled in health plans with medical and drug coverage on their index date in order to be included in the cohorts. The following age groups were included in the cohort: 12-17, 18-24, 25-34, and 35-54 years. Only individuals with a value of "Female" in the Sentinel Common Data Model "SEX" variable were eligible for this study.

Baseline Characteristics: We assessed the following demographic characteristics on the index date: age, sex, race, Hispanic origin, and year. Also on the index date we identified the specialty of the provider associated with the index-defining claim and classified into specialty groupings of interest. At most one provider was assigned to each index date; when more than one index-defining code occurred on the index date, the assigned provider was chosen based on the following prioritization: CPT-4 > HCPCS > NDC. Provider specialty groupings classified the provider's type and the specialty as follows:

1. Physician: Obstetrics/Gynecology
2. Physician: Cardiothoracic/Radiology/Vascular Surgery
3. Physician: Other Surgical (Not Vascular, Cardiothoracic, or Radiology)
4. Physician: Other Non-Surgical (Not Obstetrics/Gynecology/Surgery)
5. PA/APRN/RN/Midwife: Obstetrics/Gynecology
6. PA/APRN/RN: Other Surgical (Not Vascular, Cardiothoracic, or Radiology)
7. PA/APRN/RN: Other Non-Surgical (Not Obstetrics/Gynecology/Surgery)
8. Other Service Provider: Other (Not Obstetrics/Gynecology)
9. Facility: Government
10. Facility: Obstetrics/Gynecology
11. Facility: Other (Not Obstetrics/Gynecology or Government)
12. Facility: Unknown Provider Specialty
13. Known Provider but Unknown Provider Type and Specialty
14. Unknown Provider thus Unknown Provider Type and Specialty

Please see Appendices F-I for the specifications of parameters, design diagrams, baseline characteristics, and provider specialty grouping mapping used in this request.

Limitations: Algorithms used to define exposures and inclusion criteria are imperfect; thus, it is possible that there may be misclassification. Therefore, data should be interpreted with this limitation in mind.

Notes: Please contact the Sentinel Operations Center (info@sentinelssystem.org) for questions and to provide comments/suggestions for future enhancements to this document. For more information on Sentinel's routine querying modules, please refer to the documentation (<https://dev.sentinelssystem.org/projects/SENTINEL/repos/sentinel-routine-querying-tool-documentation/browse>).

Glossary of Terms for Analyses Using Cohort Identification and Descriptive Analysis (CIDA) Module*

Amount Supplied - number of units (pills, tablets, vials) dispensed. Net amount per NDC per dispensing.

Blackout Period - number of days at the beginning of a treatment episode that events are to be ignored. If an event occurs during the blackout period, the episode is excluded.

Care Setting - type of medical encounter or facility where the exposure, event, or condition code was recorded. Possible care settings include: Inpatient Hospital Stay (IP), Non-Acute Institutional Stay (IS), Emergency Department (ED), Ambulatory Visit (AV), and Other Ambulatory Visit (OA). For laboratory results, possible care settings include: Emergency Department (E), Home (H), Inpatient (I), Outpatient (O), or Unknown or Missing (U). The Care Setting, along with the Principal Diagnosis Indicator (PDX), forms the Care Setting/PDX parameter.

Ambulatory Visit (AV) - includes visits at outpatient clinics, same-day surgeries, urgent care visits, and other same-day ambulatory hospital encounters, but excludes emergency department encounters.

Emergency Department (ED) - includes ED encounters that become inpatient stays (in which case inpatient stays would be a separate encounter). Excludes urgent care visits.

Inpatient Hospital Stay (IP) - includes all inpatient stays, same-day hospital discharges, hospital transfers, and acute hospital care where the discharge is after the admission date.

Non-Acute Institutional Stay (IS) - includes hospice, skilled nursing facility (SNF), rehab center, nursing home, residential, overnight non-hospital dialysis and other non-hospital stays.

Other Ambulatory Visit (OA) - includes other non overnight AV encounters such as hospice visits, home health visits, skilled nursing facility visits, other non-hospital visits, as well as telemedicine, telephone and email consultations.

Charlson/Elixhauser Combined Comorbidity Score - calculated based on comorbidities observed during a requester-defined window around the exposure episode start date (e.g., in the 183 days prior to index).

Code Days - the minimum number of times the diagnosis must be found during the evaluation period in order to fulfill the algorithm to identify the corresponding patient characteristic.

Cohort Definition (drug/exposure) - indicates how the cohort will be defined: 01: Cohort includes only the first valid treatment episode during the query period; 02: Cohort includes all valid treatment episodes during the query period; 03: Cohort includes all valid treatment episodes during the query period until an event occurs.

Computed Start Marketing Date - represents the first observed dispensing date among all valid users within a GROUP (scenario) within each Data Partner site.

Days Supplied - number of days supplied for all dispensings in qualifying treatment episodes.

Eligible Members - number of members eligible for an incident treatment episode (defined by the drug/exposure and event washout periods) with drug and medical coverage during the query period.

Enrollment Gap - number of days allowed between two consecutive enrollment periods without breaking a "continuously enrolled" sequence.

Episodes - treatment episodes; length of episode is determined by days supplied in one dispensing or consecutive dispensings bridged by the episode gap.

Episode Gap - number of days allowed between two (or more) consecutive exposures (dispensings/procedures) to be considered the same treatment episode.

Event Deduplication - specifies how events are counted by the Modular Program (MP) algorithm: 0: Counts all occurrences of a health outcome of interest (HOI) during an exposure episode; 1: de-duplicates occurrences of the same HOI code and code type on the same day; 2: de-duplicates occurrences of the same HOI group on the same day (e.g., de-duplicates at the group level).

Exposure Episode Length - number of days after exposure initiation that is considered "exposed time."

Exposure Extension Period - number of days post treatment period in which the outcomes/events are counted for a treatment episode. Extensions are added after any episode gaps have been bridged.

Lookback Period - number of days wherein a member is required to have evidence of pre-existing condition (diagnosis/procedure/drug dispensing).

Maximum Episode Duration - truncates exposure episodes after a requester-specified number of exposed days. Applied after any gaps are bridged and extension days added to the length of the exposure episode.

**Glossary of Terms for Analyses Using
Cohort Identification and Descriptive Analysis (CIDA) Module***

Member-Years - sum of all days of enrollment with medical and drug coverage in the query period preceded by an exposure washout period all divided by 365.25.

Minimum Days Supplied - specifies a minimum number of days in length of the days supplied for the episode to be considered.

Minimum Episode Duration - specifies a minimum number of days in length of the episode for it to be considered. Applied after any gaps are bridged and extension days added to the length of the exposure episode.

Monitoring Period - used to define time periods of interest for both sequential analysis and simple cohort characterization

Principal Diagnosis (PDX) - diagnosis or condition established to be chiefly responsible for admission of the patient to the hospital. 'P' = principal diagnosis, 'S' = secondary diagnosis, 'X' = unspecified diagnosis, '.' = blank. Along with the Care Setting values, forms the Caresetting/PDX parameter.

Query Period - period in which the modular program looks for exposures and outcomes of interest.

Switch Evaluation Step Value - value used to differentiate evaluation step. Each switch pattern can support up to 2 evaluation steps (0 = switch pattern evaluation start; 1 = first evaluation; 2 = second evaluation).

Switch Gap Inclusion Indicator - indicator for whether gaps in treatment episodes that are included in a switch episode will be counted as part of the switch episode duration.

Switch Pattern Cohort Inclusion Date - indicates which date to use for inclusion into the switch pattern cohort of interest as well as optionally as the index date of the treatment episode initiating the switch pattern. Valid options are the product approval date, product marketing date, other requester defined date, or computed start marketing date.

Switch Pattern Cohort Inclusion Strategy - indicates how the switch pattern cohort inclusion date will be used: 01: used only as a switch cohort entry date. First treatment episode dispensing date is used as index for computing time to first switch; 02: used as switch cohort entry date and as initial switch step index date for computing time to first switch.

Treatment Episode Truncation Indicator - indicates whether the exposure episode will be truncated at the occurrence of a requester-specified code.

Washout Period (drug/exposure) - number of days a user is required to have no evidence of prior exposure (drug dispensing/procedure) and continuous drug and medical coverage prior to an incident treatment episode.

Washout Period (event/outcome) - number of days a user is required to have no evidence of a prior event (procedure/diagnosis) and continuous drug and medical coverage prior to an incident treatment episode.

Years at Risk - number of days supplied plus any episode gaps and exposure extension periods all divided by 365.25.

*all terms may not be used in this report

DP12	01/01/2007	02/28/2025

¹End Date represents the earliest of: (1) query end date, or (2) last day of the most recent month for which all of a Data Partner's data tables (enrollment, dispensing, etc.) have at least 80% of the record count relative to the prior month.

Appendix B. List of Generic and Brand Names of Medical Products Used to Define Exposures in this Request

Generic Name	Brand Name
	Etonogestrel
etonogestrel	Nexplanon

Appendix C. List of Current Procedural Terminology, Fourth Edition (CPT-4) and Healthcare Common Procedure Coding System, Level II (HCPCS) Codes Used to Define Exposures in this Request

Code	Description	Code Category	Code Type
Etonogestrel			
J7307	Etonogestrel (contraceptive) implant system, including implant and supplies	Procedure	HCPCS
Any Insertion			
11981	Insertion, drug-delivery implant (ie, bioresorbable, biodegradable, non-biodegradable)	Procedure	CPT-4
11983	Removal with reinsertion, non-biodegradable drug delivery implant	Procedure	CPT-4
Any Removal			
11982	Removal, non-biodegradable drug delivery implant	Procedure	CPT-4
11983	Removal with reinsertion, non-biodegradable drug delivery implant	Procedure	CPT-4

Appendix D. List of Generic and Brand Names of Medical Products Used to Define Inclusion Criteria in this Request

Generic Name	Brand Name
	Etonogestrel
etonogestrel	Nexplanon

Appendix E. List of Current Procedural Terminology, Fourth Edition (CPT-4) and Healthcare Common Procedure Coding System, Level II (HCPCS) Codes Used to Define Inclusion Criteria in this Request

Code	Description	Code Category	Code Type
Etonogestrel			
J7307	Etonogestrel (contraceptive) implant system, including implant and supplies	Procedure	HCPCS
Any Insertion			
11981	Insertion, drug-delivery implant (ie, bioresorbable, biodegradable, non-biodegradable)	Procedure	CPT-4
11983	Removal with reinsertion, non-biodegradable drug delivery implant	Procedure	CPT-4
Insertion Only			
11981	Insertion, drug-delivery implant (ie, bioresorbable, biodegradable, non-biodegradable)	Procedure	CPT-4
Any Removal			
11982	Removal, non-biodegradable drug delivery implant	Procedure	CPT-4
11983	Removal with reinsertion, non-biodegradable drug delivery implant	Procedure	CPT-4
Removal Only			
11982	Removal, non-biodegradable drug delivery implant	Procedure	CPT-4
Removal and Reinsertion			
11983	Removal with reinsertion, non-biodegradable drug delivery implant	Procedure	CPT-4

Appendix F. Specifications Defining Parameters for this Request

The Cohort Identification and Descriptive Analysis (CIDA) tool version 14.2.1 was executed to estimate number of etonogestrel implant insertions and removals in the Sentinel Distributed Database (SDD).							
Query Period: January 1, 2015 - May 31, 2025 Coverage Requirement: Medical & Drug Coverage Minimum Pre-Index Enrollment Days (optional): 0 days Minimum Post-Index Required Days (optional): 0 days Enrollment Gap: 45 days Age Groups: 12-17, 18-24, 25-34, 35-54 Sex: F Other Demographic Restrictions: None Stratifications: Year, provider specialty, provider specialty * year Censor output categorization: N/A Data Restrictions: None Distribution of index-defining codes: Yes Envelope Macro: No reclassification on inpatient Adate (1) Freeze data: No Drop Censor Output Indicator: Yes							
Exposure/Event							
Scenario	Index Exposure/ Event	Cohort Definition	Washout Period	Exclude Evidence of Days Supply if Event Washout Includes Dispensings	Care Setting and Diagnosis Position Requirements	Forced Supply to Attach to Dispensings	Create Baseline Table?
1	Etonogestrel implant or general drug implant insertion	02: Cohort includes all valid index dates per individual during the query period.	0 days	N: Lookback period should search for evidence of a date or an interval	Any care setting	--	Yes
2	Etonogestrel implant	02: Cohort includes all valid index dates per individual during the query period.	0 days	N: Lookback period should search for evidence of a date or an interval	Any care setting	--	Yes

Appendix F. Specifications Defining Parameters for this Request

Scenario	Exposure/Event						
	Index Exposure/ Event	Cohort Definition	Washout Period	Exclude Evidence of Days Supply if Event Washout Includes Dispensings	Care Setting and Diagnosis Position Requirements	Forced Supply to Attach to Dispensings	Create Baseline Table?
3	Etonogestrel implant	02: Cohort includes all valid index dates per individual during the query period.	0 days	N: Lookback period should search for evidence of a date or an interval	Any care setting	--	Yes
4	Etonogestrel implant	02: Cohort includes all valid index dates per individual during the query period.	0 days	N: Lookback period should search for evidence of a date or an interval	Any care setting	--	Yes
5	General drug implant insertion	02: Cohort includes all valid index dates per individual during the query period.	0 days	N: Lookback period should search for evidence of a date or an interval	Any care setting	--	Yes
6	Etonogestrel implant	02: Cohort includes all valid index dates per individual during the query period.	0 days	N: Lookback period should search for evidence of a date or an interval	Any care setting	--	Yes
7	Etonogestrel implant	02: Cohort includes all valid index dates per individual during the query period.	0 days	N: Lookback period should search for evidence of a date or an interval	Any care setting	--	Yes

Appendix F. Specifications Defining Parameters for this Request

Exposure/Event							
Scenario	Index Exposure/ Event	Cohort Definition	Washout Period	Exclude Evidence of Days Supply if Event Washout Includes Dispensings	Care Setting and Diagnosis Position Requirements	Forced Supply to Attach to Dispensings	Create Baseline Table?
8	General drug implant removal	02: Cohort includes all valid index dates per individual during the query period.	0 days	N: Lookback period should search for evidence of a date or an interval	Any care setting	--	Yes
9	Etonogestrel implant	02: Cohort includes all valid index dates per individual during the query period.	0 days	N: Lookback period should search for evidence of a date or an interval	Any care setting	--	Yes
