[1]The cohort includes patients who received at least one COVID-19 vaccine. The index date is defined as the date of the first COVID-19 vaccination, which is identified as the first instance with no prior COVID-19 vaccination records.

[2]The code category is defined as PX or RX: PX stands for "Procedure," and RX stands for "Dispensing."

[3]Code type is defined as C4, ND, or CV: C4 refers to Current Procedural Terminology, Fourth Edition (CPT-4); ND stands for National Drug Codes (NDCs); and CV represents the immunization information systems (IIS) Vaccine Administered Code Set (CVX) codes.

[4]Encounter Care Setting is defined as AV, OA, ED, IP, or IS: AV stands for Ambulatory Visit; OA refers to Other Ambulatory Visit; ED means Emergency Department; IP denotes Inpatient Hospital Stay; and IS represents Non-Acute Institutional Stay.
N/A stands for Not Applicable.
