

## Disclaimer

The following report(s) provides findings from an FDA-initiated query using Sentinel. While Sentinel queries may be undertaken to assess potential medical product safety risks, they may also be initiated for various other reasons. Some examples include determining a rate or count of an identified health outcome of interest, examining medical product use, exploring the feasibility of future, more detailed analyses within Sentinel, and seeking to better understand Sentinel capabilities.

Data obtained through Sentinel are intended to complement other types of evidence such as preclinical studies, clinical trials, post market studies, and adverse event reports, all of which are used by FDA to inform regulatory decisions regarding medical product safety. The information contained in this report is provided as part of FDA's commitment to place knowledge acquired from Sentinel in the public domain as soon as possible. Any public health actions taken by FDA regarding products involved in Sentinel queries will continue to be communicated through existing channels.

FDA wants to emphasize that the fact that FDA has initiated a query involving a medical product and is reporting findings related to that query does not mean that FDA is suggesting health care practitioners should change their prescribing practices for the medical product or that patients taking the medical product should stop using it. Patients who have questions about the use of an identified medical product should contact their health care practitioners.

The following report contains a description of the request, request specifications, and results from the modular program run(s).

## Overview for Request lymph\_mpl1r\_wp003

**Request ID:** lymph\_mpl1r\_wp003\_nsdv\_v01

**Query Description:** The goal of this query was to use the Cohort Identification and Descriptive Analysis (CIDA) Tool to obtain counts of individuals with lymphoma (Hodgkin's and non-Hodgkin's) in preparation for a Patient Episode Profile Retrieval (PEPR) Tool run and for chart retrieval for algorithm validation. Hodgkin's and non-Hodgkin's lymphoma cohorts were also specifically identified for background purposes only. Please note that the final eligible members for the PEPR and chart review portion of the project were a subset of those reported here.

**Sentinel Routine Querying Module:** Cohort Identification and Descriptive Analysis (CIDA) module, version 5.4.3

**Data Source:** Data from January 1, 2016 to June 30, 2018 from four Data Partners contributing to the Sentinel Distributed Database (SDD) were included in this report. This request was distributed on September 28, 2018. See Appendix A for a list of the latest dates of available data for each Data Partner.

**Study Design:** The request was designed to calculate background rates. The number of qualifying members with the outcome of interest were calculated overall and stratified by sex, age group, sex and age group, and year.

**Health Outcome of Interest:** The health outcome of interest (HOI) was defined using International Classification of Diseases, Ninth Revision, Clinical Modification (ICD-9-CM) and International Classification of Diseases, Tenth Revision, Clinical Modification (ICD-10-CM) diagnosis codes for non-Hodgkin's and Hodgkin's lymphoma; ICD-10-CM codes were used to identify the cases during the query period while ICD-9-CM codes were only used to assess incidence. An HOI is indicated when two relevant diagnosis codes of interest occur within 183 days of each other in any care setting. A Hodgkin's lymphoma indication requires two Hodgkin's lymphoma codes, and a non-Hodgkin's lymphoma indication requires two non-Hodgkin's lymphoma codes. Additionally, an indication of "all lymphoma" requires two occurrences of either Hodgkin's or non-Hodgkin's lymphoma codes. Incident cases of lymphoma were identified using a 365 day washout of the code group of interest (e.g., Hodgkin's cases had two diagnosis codes for Hodgkin's within 183 days of each other, and no Hodgkin's code in the 365 days before the first code). The additional criteria to identify cases of interest are described in the Inclusion Criteria section below. See Appendix B for a list of lymphoma diagnosis codes used.

**Cohort Eligibility Criteria:** Those included in each lymphoma cohort were required to be continuously enrolled in plans with medical and drug coverage for at least 365 days prior to their index date (first lymphoma code of interest), during which gaps in coverage of up to 45 days were allowed. Members were excluded if they had a relevant lymphoma diagnosis within 365 days prior to index date. The Hodgkin's lymphoma cohort excluded those with one or more codes for Hodgkin's lymphoma in the 365 day washout, the non-Hodgkin's lymphoma cohort excluded based on non-Hodgkin's lymphoma, and the cohort of any lymphoma diagnosis excluded based on the full lymphoma code list. Only the first valid incident episode per member was included.

The following age groups were included in the cohort: 15-34, 35-59, and 60+ years. Male and female patients were considered. Only individuals whose charts were able to be retrieved were included.

**Inclusion Criteria:** All lymphoma cohorts, in addition to the diagnosis codes described above in the HOI section, were required to have at least one biopsy procedure code and at least one imaging procedure code to have occurred within 90 days before or after the first lymphoma code. Biopsy and imaging procedures were defined using ICD-9-CM and International Classification of Diseases, Tenth Revision, Procedure Coding System (ICD-10-PCS) procedure codes, Healthcare Common Procedure Coding System (HCPCS) codes, and Current Procedural Terminology, Fourth Edition (CPT-4) codes. Please refer to Appendix C for a list of procedure codes.

**Please see Appendix D for the specifications of parameters used in the analyses for this request.**

**Limitations:** 1) As with all observational studies, this evaluation was limited in its ability to control for all sources of potential bias. 2) Index and inclusion criteria may be misclassified due to imperfect identification algorithms.

**Notes:** Please contact the Sentinel Operations Center ([info@sentinelssystem.org](mailto:info@sentinelssystem.org)) for questions and to provide comments/suggestions for future enhancements to this document. **Glossary of Terms for Analyses Using  
Cohort Identification and Descriptive Analysis (CIDA) Module\***

**Amount Supplied** - number of units (pills, tablets, vials) dispensed. Net amount per NDC per dispensing.

**Blackout Period** - number of days at the beginning of a treatment episode that events are to be ignored. If an event occurs during the blackout period, the episode is excluded.

**Care Setting** - type of medical encounter or facility where the exposure, event, or condition code was recorded. Possible care settings include: Inpatient Hospital Stay (IP), Non-Acute Institutional Stay (IS), Emergency Department (ED), Ambulatory Visit (AV), and Other Ambulatory Visit (OA). For laboratory results, possible care settings include: Emergency Department (E), Home (H), Inpatient (I), Outpatient (O), or Unknown or Missing (U). The Care Setting, along with the Principal Diagnosis Indicator (PDX), forms the Care Setting/PDX parameter.

**Ambulatory Visit (AV)** - includes visits at outpatient clinics, same-day surgeries, urgent care visits, and other same-day ambulatory hospital encounters, but excludes emergency department encounters.

**Emergency Department (ED)** - includes ED encounters that become inpatient stays (in which case inpatient stays would be a separate encounter). Excludes urgent care visits.

**Inpatient Hospital Stay (IP)** - includes all inpatient stays, same-day hospital discharges, hospital transfers, and acute hospital care where the discharge is after the admission date.

**Non-Acute Institutional Stay (IS)** - includes hospice, skilled nursing facility (SNF), rehab center, nursing home, residential, overnight non-hospital dialysis and other non-hospital stays.

**Other Ambulatory Visit (OA)** - includes other non overnight AV encounters such as hospice visits, home health visits, skilled nursing facility visits, other non-hospital visits, as well as telemedicine, telephone and email consultations.

**Charlson/Elixhauser Combined Comorbidity Score** - calculated based on comorbidities observed during a requester-defined window around the exposure episode start date (e.g., in the 183 days prior to index).

**Code Days** - the minimum number of times the diagnosis must be found during the evaluation period in order to fulfill the algorithm to identify the corresponding patient characteristic.

**Cohort Definition (drug/exposure)** - indicates how the cohort will be defined: 01: Cohort includes only the first valid treatment episode during the query period; 02: Cohort includes all valid treatment episodes during the query period; 03: Cohort includes all valid treatment episodes during the query period until an event occurs.

**Computed Start Marketing Date** - represents the first observed dispensing date among all valid users within a GROUP (scenario) within each Data Partner site.

**Days Supplied** - number of days supplied for all dispensings in qualifying treatment episodes.

**Eligible Members** - number of members eligible for an incident treatment episode (defined by the drug/exposure and event washout periods) with drug and medical coverage during the query period.

**Enrollment Gap** - number of days allowed between two consecutive enrollment periods without breaking a "continuously enrolled" sequence.

**Episodes** - treatment episodes; length of episode is determined by days supplied in one dispensing or consecutive dispensings bridged by the episode gap.

**Episode Gap** - number of days allowed between two (or more) consecutive exposures (dispensings/procedures) to be considered the same treatment episode.

**Event Deduplication** - specifies how events are counted by the Modular Program (MP) algorithm: 0: Counts all occurrences of a health outcome of interest (HOI) during an exposure episode; 1: de-duplicates occurrences of the same HOI code and code type on the same day; 2: de-duplicates occurrences of the same HOI group on the same day (e.g., de-duplicates at the group level).

**Exposure Episode Length** - number of days after exposure initiation that is considered "exposed time."

**Exposure Extension Period** - number of days post treatment period in which the outcomes/events are counted for a treatment episode. Extensions are added after any episode gaps have been bridged.

**Lookback Period** - number of days wherein a member is required to have evidence of pre-existing condition (diagnosis/procedure/drug dispensing).

**Maximum Episode Duration** - truncates exposure episodes after a requester-specified number of exposed days. Applied after any gaps are bridged and extension days added to the length of the exposure episode.

**Member-Years** - sum of all days of enrollment with medical and drug coverage in the query period preceded by an exposure washout period all divided by 365.25.

**Minimum Days Supplied** - specifies a minimum number of days in length of the days supplied for the episode to be considered.

**Minimum Episode Duration** - specifies a minimum number of days in length of the episode for it to be considered. Applied after any gaps are bridged and extension days added to the length of the exposure episode.

**Monitoring Period** - used to define time periods of interest for both sequential analysis and simple cohort characterization requests.

**Principal Diagnosis (PDX)** - diagnosis or condition established to be chiefly responsible for admission of the patient to the hospital. 'P' = principal diagnosis, 'S' = secondary diagnosis, 'X' = unspecified diagnosis, '.' = blank. Along with the Care Setting values, forms the CareSetting/PDX parameter.

**Query Period** - period in which the modular program looks for exposures and outcomes of interest.

**Switch Evaluation Step Value** - value used to differentiate evaluation step. Each switch pattern can support up to 2 evaluation steps (0 = switch pattern evaluation start; 1 = first evaluation; 2 = second evaluation).

**Switch Gap Inclusion Indicator** - indicator for whether gaps in treatment episodes that are included in a switch episode will be counted as part of the switch episode duration.

**Switch Pattern Cohort Inclusion Date** - indicates which date to use for inclusion into the switch pattern cohort of interest as well as optionally as the index date of the treatment episode initiating the switch pattern. Valid options are the product approval date, product marketing date, other requester defined date, or computed start marketing date.

**Switch Pattern Cohort Inclusion Strategy** - indicates how the switch pattern cohort inclusion date will be used: 01: used only as a switch cohort entry date. First treatment episode dispensing date is used as index for computing time to first switch; 02: used as switch cohort entry date and as initial switch step index date for computing time to first switch.

**Treatment Episode Truncation Indicator** - indicates whether the exposure episode will be truncated at the occurrence of a requester-specified code.

**Washout Period (drug/exposure)** - number of days a user is required to have no evidence of prior exposure (drug dispensing/procedure) and continuous drug and medical coverage prior to an incident treatment episode.

**Washout Period (event/outcome)** - number of days a user is required to have no evidence of a prior event (procedure/diagnosis) and continuous drug and medical coverage prior to an incident treatment episode.

**Years at Risk** - number of days supplied plus any episode gaps and exposure extension periods all divided by 365.25.

200.56	Diagnosis	ICD-9-CM	Primary central nervous system lymphoma, intrapelvic lymph nodes
200.57	Diagnosis	ICD-9-CM	Primary central nervous system lymphoma, spleen
200.58	Diagnosis	ICD-9-CM	Primary central nervous system lymphoma, lymph nodes of multiple sites
200.6	Diagnosis	ICD-9-CM	Anaplastic large cell lymphoma
200.60	Diagnosis	ICD-9-CM	Anaplastic large cell lymphoma, unspecified site, extranodal and solid organ sites
200.61	Diagnosis	ICD-9-CM	Anaplastic large cell lymphoma, lymph nodes of head, face, and neck
200.62	Diagnosis	ICD-9-CM	Anaplastic large cell lymphoma, intrathoracic lymph nodes
200.63	Diagnosis	ICD-9-CM	Anaplastic large cell lymphoma, intra-abdominal lymph nodes
200.64	Diagnosis	ICD-9-CM	Anaplastic large cell lymphoma, lymph nodes of axilla and upper limb
200.65	Diagnosis	ICD-9-CM	Anaplastic large cell lymphoma, lymph nodes of inguinal region and lower limb
200.66	Diagnosis	ICD-9-CM	Anaplastic large cell lymphoma, intrapelvic lymph nodes
200.67	Diagnosis	ICD-9-CM	Anaplastic large cell lymphoma, spleen
200.68	Diagnosis	ICD-9-CM	Anaplastic large cell lymphoma, lymph nodes of multiple sites
200.7	Diagnosis	ICD-9-CM	Large cell lymphoma
200.70	Diagnosis	ICD-9-CM	Large cell lymphoma, unspecified site, extranodal and solid organ sites
200.71	Diagnosis	ICD-9-CM	Large cell lymphoma, lymph nodes of head, face, and neck
200.72	Diagnosis	ICD-9-CM	Large cell lymphoma, intrathoracic lymph nodes
200.73	Diagnosis	ICD-9-CM	Large cell lymphoma, intra-abdominal lymph nodes
200.74	Diagnosis	ICD-9-CM	Large cell lymphoma, lymph nodes of axilla and upper limb
200.75	Diagnosis	ICD-9-CM	Large cell lymphoma, lymph nodes of inguinal region and lower limb
200.76	Diagnosis	ICD-9-CM	Large cell lymphoma, intrapelvic lymph nodes
200.77	Diagnosis	ICD-9-CM	Large cell lymphoma, spleen
200.78	Diagnosis	ICD-9-CM	Large cell lymphoma, lymph nodes of multiple sites
200.8	Diagnosis	ICD-9-CM	Other named variants of lymphosarcoma and reticulosarcoma
200.80	Diagnosis	ICD-9-CM	Other named variants, unspecified site, extranodal and solid organ sites
200.81	Diagnosis	ICD-9-CM	Other named variants of lymphosarcoma and reticulosarcoma of lymph nodes of head, face, and neck
200.82	Diagnosis	ICD-9-CM	Other named variants of lymphosarcoma and reticulosarcoma of intrathoracic lymph nodes
200.83	Diagnosis	ICD-9-CM	Other named variants of lymphosarcoma and reticulosarcoma of intra-abdominal lymph nodes
200.84	Diagnosis	ICD-9-CM	Other named variants of lymphosarcoma and reticulosarcoma of lymph nodes of axilla and upper limb
200.85	Diagnosis	ICD-9-CM	Other named variants of lymphosarcoma and reticulosarcoma of lymph nodes of inguinal region and lower limb
200.86	Diagnosis	ICD-9-CM	Other named variants of lymphosarcoma and reticulosarcoma of intrapelvic lymph nodes
200.87	Diagnosis	ICD-9-CM	Other named variants of lymphosarcoma and reticulosarcoma of spleen
200.88	Diagnosis	ICD-9-CM	Other named variants of lymphosarcoma and reticulosarcoma of lymph nodes of multiple sites
202	Diagnosis	ICD-9-CM	Other malignant neoplasms of lymphoid and histiocytic tissue
202.0	Diagnosis	ICD-9-CM	Nodular lymphoma
202.00	Diagnosis	ICD-9-CM	Nodular lymphoma, unspecified site, extranodal and solid organ sites
202.01	Diagnosis	ICD-9-CM	Nodular lymphoma of lymph nodes of head, face, and neck

### Appendix D. Specifications Defining Parameters for this Request

The goal of this query was to use the Cohort Identification and Descriptive Analysis (CIDA) Tool to obtain counts of individuals with lymphoma (Hodgkin's and non-Hodgkin's) in preparation for a Patient Episode Profile Retrieval (PEPR) Tool run and for chart retrieval for algorithm validation. Hodgkin's and non-Hodgkin's lymphoma cohorts were also specifically identified for background purposes only.

**Query Period:** January 1, 2016 to June 30, 2018  
**Coverage Requirement:** Medical and Drug Coverage  
**Pre-exposure Enrollment:** 12 months (365 days)  
**Enrollment Gap:** 45 days  
**Sex:** Male, Female  
**Stratify by:** Age  
**Age Groups:** 15-34, 35-59, and 60+ years  
**Freeze Data:** Yes  
**Envelope Macro:** On, after 2 diagnosis definitions determined, inclusive of end of encounter only (1)\*

Scenario	Cohort	Care Setting	Exposure			Inclusion/Exclusion Criteria					
			Episode Truncation Criteria	Incident with respect to:	Washout (days)	Cohort Definition	Inclusion/Exclusion group	Criteria	Care Setting	Lookback Period for Biopsy/Imaging Criteria	PEPR Pull
1	Lymphoma (2 diagnoses within 183 days)**	Any	End of surveillance period, disenrollment, death	Lymphoma (1 diagnosis)	365	Only the first valid treatment episode during the query period (01)	Imaging code AND Biopsy code	Include	Any	(-90, 90)	Yes
2	Non-Hodgkin's Lymphoma (2 diagnoses within 183 days)**	Any	End of surveillance period, disenrollment, death	Non-Hodgkin's Lymphoma (1 diagnosis)	365	Only the first valid treatment episode during the query period (01)	Imaging code AND Biopsy code	Include	Any	(-90, 90)	No
3	Hodgkin's Lymphoma (2 diagnoses within 183 days)**	Any	End of surveillance period, disenrollment, death	Hodgkin's Lymphoma (1 diagnosis)	365	Only the first valid treatment episode during the query period (01)	Imaging code AND Biopsy code	Include	Any	(-90, 90)	No

\*All non-inpatient care setting codes will be set to IPX (inpatient care, any/unknown care setting) if the visit occurs within an inpatient encounter (inclusive on end date, not inclusive on start date). In other words, an ambulatory visit that occurs on first day of inpatient visit will still be marked as ambulatory visit.

\*\*The date of lymphoma event is set to first diagnosis, and the two diagnoses cannot be on the same day. There is no continuous enrollment requirement for second lymphoma diagnosis. Biopsy and imaging will be assessed with respect to the first diagnosis.

Note: Query will also return overall counts of each cohort, the number of eligible members, person-time at risk, and a few other outputs overall and stratified by age, sex, and year.
